COCKTAIL DRINKER'S GUIDE

PLEASE READ CAREFULLY BEFORE YOU MAKE YOUR CHOICE!

230 TYPES OF DIFFERENT COCKTAILS

We offer 230 types of different cocktails - all studied & created by our mixologist in a long and fun journey. We know it's very hard to choose, that's why all cocktails are categorized into 3 main sections: Cocktails By Style, Cocktails by Flavor and Cocktails By Alcohol.

We advise our guests to check our "Table of Contents" to have more information about each section and their categories for more accurate decisions.

HIGH QUALITY & "EXTRA BOOZY" CONCEPT

As our business concept, our cocktails are prepared only with high-quality alcohol brands with extra alcohol content than the usual/classic recipes, to offer our guests the best and wildest cocktail experience.

The total size, ABV % and all ingredient details are given for each of our cocktails, where you can evaluate our cocktails according to these values and elements.

WHAT IS ABV (ALCOHOL BY VOLUME)?

Alcohol by volume (ABV) is a metric used to determine the alcohol content in an alcoholic beverage. The measurement shows what percentage of the beverage's total volume is pure alcohol.

ABV does not stand for the total size of alcohol in a cocktail, the value varies according to every ingredient and their % of alcohol that is added in the mixture.

Please evaluate the total size of the drink and ABV values together, in order to have an accurate decision & conclusion. *For further information, please ask us for assistance.*

DISCLAIMER & WARNING

Our ABV levels are much higher than the industry standards, where the regular ABV percentages for signature cocktails vary between 7% - 15%.

Our cocktails' ABV values vary between 15%-25% for the regular ones and are above 25% for our special category "R.I.P. Cocktails". Please also take into account that our cocktail portions are mostly big and include mixtures that enhances the effects of alcohol with each intake.

Please consider each value carefully and ask us for further assistance if needed.
