

PRODUCT OVERVIEW: 16-6-8

Desert Green Turf recommends using DGT Select One Shot 16-6-8 to provide your lawn with effective broad-spectrum control of a variety of established weeds and annual grass. For best results, follow the suggested application steps outlined below.

Do you have a newly seeded or sodded lawn?
 Do not use this product until roots have been established & at least 3 mows have occurred to protect the integrity of your lawn.

PREEMERGENT CRABGRASS

For best results in the spring, apply this product 1-2 weeks before the expected emergence of crab grass. This would be late March/early April, when the temperature is 50°F for 4-5 consecutive days. A second application can be applied 6-10 weeks after the initial application.

POSTEMERGENT WEEDS

For adequate weed control, this product must contact the leaves of the weeds, so apply when weeds are young and actively growing, preferably in the morning when dew is on the grass. If no dew is present, lightly spray the grass so herbicide can stick to the leaves and start its process.

1 Lawn should be dry at time of application.

2 Adjust spreader to correct setting, Refer to Spreader Setting table.

3 Use the Application Rate table to determine proper product amount.

4 Add amount determined in Step 3 to already adjusted spreader.

5 Apply product by walking at a brisk pace, insuring product spreads evenly.

6 After application, DO NOT irrigate for 24 hours, this includes rainfall.

Spreader Settings <small>*Guideline Only</small>	Best Pro.....4B*	Application Rates <small>*Recommended Rate</small>	500 sq. ft.....1.5 lbs.*
	Earth Way Rotary.....12*		1,000 sq. ft.....3 lbs.*
	Lesco.....13*		3,000 sq. ft.....9 lbs.*

Fall Application Information

DGT Select Weed & Feed can also be used in the late summer and early fall (August-November) to provide control of crabgrass through the early part of next spring.

Application Rates <small>*Recommended Rate</small>	500 sq. ft.....2.75lbs.*
	1,000 sq. ft.....4.50lbs.*
	3,000 sq. ft.....13.5 lbs.*

APPLICATION PRECAUTIONS

- Walkways should be dry at time of application.
- Do not contaminate potable water
- Keep away from pools, ponds, etc.
- Sweep walkways prior to irrigation.
- Store in a well-ventilated place, container closed tight.
