

PRODUCT OVERVIEW 16-6-8 Broadleaf

Desert Green Turf recommends using DGT Select Turf Supreme 16-6-8 as an herbicide to combat broadleaf weeds that naturally occur in lawns as springtime comes around. For best results, follow the suggested application steps outlined below.

1 1-2 days before applying, mow lawn to normal height. 1 day before, water thoroughly.

2 Adjust spreader to correct setting, Refer to Spreader Setting table.

3 Use the Application Rate table to determine proper product amount.

4 Add amount determined in Step 3 to already adjusted spreader.

5 Apply product in the morning, when dew is present, by walking at a brisk pace, insuring an even spread.

6 If grass isn't moist at application time, sprinkle with water. After applying, do not water for 1 day.

Why do you wait to water after applying?
 These herbicides are absorbed through the leaves & translocated to the roots. Immediate water wouldn't allow proper absorption.

WEEDS CONTROLLED
 PLUS, MANY OTHER COMMON LAWN WEEDS
