INFORMED CONSENT FOR BIOFEEDBACK TRAINING

What is Biofeedback Training?

Biofeedback is a technique that measures key functions of the body and based on the result the device is able to address the imbalances by delivering healthy frequencies through the harnesses attached to your body, helping the body to return to its ideal state.

The QuexEd biofeedback system that we use is **cleared by the FDA as a Class 2 medical device.**

What to expect from a Biofeedback session?

The scope of my practice through the use of this biofeedback system includes **stress reduction, relaxation training, pain management, muscle re-education and brain wave relaxation training**. Although this training is expected to produce beneficial results, such results cannot be guaranteed. Biofeedback training is a complement, not a substitute for medical or psychological treatment and any ongoing treatment should not be discontinued without advice of your treating physician.

Do you wear a pacemaker? YES ☐ NO ☐

Do you wear other implantable electrical devices? YES ☐ NO ☐

If your answer to any of the two questions above is 'YES', you should not proceed with biofeedback therapy because the electrical frequencies generated by the device could interfere with the operation of the pacemaker or other implantable electrical device.

Biofeedback therapy is non-invasive. It is important to notify the practitioner if your medical history changes such as becoming pregnant or if you have been diagnosed with an unexpected medical condition.
