

OpEx 2020

Join leading operational excellence experts and business executives in learning about key topics driving manufacturing in North America.

- Recent events have driven businesses to rethink their manufacturing operations and core processes.
- Scaling up/down, maintaining/acquiring talent and reducing training time has driven numerous challenges.
- OpEx is critical in maintaining peak performance and profitability while delivering customer value.

Rosie the Riveter symbolized the beginning of diversity and achievement in the American workforce. She rose to the occasion and defied odds to achieve quality and productivity never seen before.
