

Public Water Supply (PWS) & Inventory Information		
PWS Name:	Indian Village Water system	
PWSID:	LA1073058	
Enter Date Planned to Report to LDH:		
Is this the Initial Inventory or an Inventory Update ?	Initial inventory	
PWS's Preferred Point of Contact	Name:	Alicia Pitts
	Phone:	(318) 644-5453
	Email Address:	indianvillage2@bellsouth.net

Part 1: Historical Records Review	
Type of Record	Describe the Records Reviewed for Your Inventory
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	Original water plans when system was established.
2. Construction Records, Ordinances, and Plumbing Codes <i>Examples: Codes, Ordinances or rules of services that prohibited lead piping, permits for installing or replacing service lines.</i>	
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	All meters were replaced from 2021-2023

2. If the system utilized Predictive Modeling or Statistical Analysis, please briefly describe the process below:

Part 4. Inventory Summary Table 1

When you are using the **Service Line Information** worksheet, the classifications in the Column "Material Classification for the Entire Service Line" (Column M) will be used to calculate the total number of service lines for each of the four

Service Line Material Classification	Definition
Lead	Any portion of the service line is known to be made of lead. ²
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material
TOTAL	

Notes

1 This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

2 A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines.

Part 5. Public Accessibility

How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you **must** provide the inventory online.*

Interactive online map

Printed tabular data

Static online map
Online spreadsheet
Printed service line map

Information on water utility mailings or newsletter
Hard copy information available in water system office
Other

If "Other", please describe:

Light blue shaded area for describing "Other" options.

If the inventory is available online (i.e., system's website, etc.), provide a link to the website below:
