

Basic instructions for the fuel and vent line kit

Pictures are attached and should be pretty self-explanatory.

Fuel tank, rear diff, coolant overflow, and front diff vent lines will all get a filter

Following lengths are guidelines for proper installation of the clear hose

Fuel vent relocation;

Check valve to filter 3" CHECK VALVE ARROW WILL POINT TOWARDS THE TANK. Letting air in not out.

Filter to back of passenger seat 24"

Rear diff relocation;

Diff line to filter 8"

Filter to inside of seat rail 19"
