

Wildcat XX Seat Riser Instructions

1. Remove driver seat and flip upside down. Remove the two rubber grommets and remove the latch assembly.
2. Install the outer seat riser first with the bolts provided. Tighten with ½ inch wrench. Locktite is recommended.
3. Reinstall seat grommets on top of the new spacer.
4. Install the inner seat risers with bolts provided. Order as follows, bolt, thick washer seat latch, spacer, seat frame, thin washer, locknut. Then tighten.
5. Put seat back in machine and enjoy your new comfort.
