- Revitalize Commercial Districts

Charles LIU

Only candidate endorsed by POLICE and BGG

(Business for Good Government) for Fremont City Council District 6

I am a long time Fremont resident and started my small solar business in Fremont 12 years ago. The COVID-19 pandemic has made our top issues much more challenging, such as **1) public safety, 2) small business survival and jobs, 3) affordable housing, and 4) traffic congestion.**

We can do better when we work together!

Public Safety

Covid-19 has created an economic crisis while deepening the insecurities of our residents with increase crime. I will work with the Council to adequately fund the police to maintain public safety. The police should get all the support they need from the Council and the community to do their best to keep everyone safe.

Small Business Survival and Jobs

As a small business owner myself, I know first-hand the pain and challenges other small businesses are facing.

Our business environment needs to be user-friendly. We need to streamline the permitting processes, lower fees and taxes, and use our taxes wisely. Small businesses are the fabric of our community, we must assist them to ensure their sustainability. Losing Cloverleaf Bowl means that we've lost Fremont's iconic past so we must do more to re-imagine ways to bring these small businesses into the 21st century while keeping our cultural history vibrant.

Affordable Housing

We must do more to expand our affordable housing inventory while making Fremont a livable and walkable community. We are in Silicon Valley and we have the talent to move us into the forefront of innovative design.

Reduce Traffic Congestion

We must engage with all stakeholders to find workable solutions to cut traffic congestion. Covid-19 has proven that work from home can be done so we will work with our region leaders to rework policies and infrastructure to further this paradigm. Employers to move away from central to distributed work locations that will further cut traffic. We will work to expand localization of services that businesses and workers want to re-imagine a 21st Century traffic-free environment.

I want to thank the Fremont Police Association and the Fremont Chamber of Commerce Political Action Committee, Business for Good Government (BGG) for their endorsements of my campaign. I understand the challenges businesses are facing and we need more advocacy to ensure that these services continue to serve our residents. We are a city in Silicon Valley so we must also rethink how we do things and find ways we can provide safe services for our residents. It'll take the collective efforts and wisdom of our communities to re-imagine ways of doing things. Again, thank you for entrusting me with your endorsement. I won't let you nor our residents down!
