

Cathodic Protection

Remote Monitoring

System - ICPM

MCPL has developed their own Cathodic Protection (CP) Remote Monitoring system called ICPM. ICPM is designed and manufactured in the United Kingdom by Cathodic Protection Professionals. The ICPM is an advanced remote monitoring device that provides both AC and DC CP data at your fingertips when ever and where ever you want. It uses the latest GPS technology and GSM 3G, 4G network via Telit platform. ICPM is designed with ultra low powered components so it is environmentally friendly. The device will work for an average life of 8+ years without battery change. So it is a highly cost effective solution to the end user. For more information about the product please see our website: www.mcpl.uk or contact us at info@mcpl.uk
