

Green-Collar Waste Environmental Policy

Green-Collar Waste Environmental Policy:

Green-Collar Waste is a fast-growing environmental services business that focuses on helping all businesses and individuals manage their rubbish in a cost effective and environmentally sensitive way.

Green-Collar Waste recognises that through our day-to-day activities we have an impact on our environment, and we aim to reduce these impacts and continually improve our environmental performance.

This statement sets out the broad environmental policy that will apply to all Green-Collar Waste's operations. Through setting clear environmental objectives and with complete staff involvement Green-Collar Waste is committed to the prevention of pollution and the continuous improvement of the environmental performance of its operations.

In-order to achieve this Green-Collar Waste will:

Demonstrate a responsible attitude towards environmental protection both as a Human Being and through its employees meet the requirements of all relevant legislation. Encourage contractors, suppliers and customers to develop a similar approach to support environmental protection. Reduce the consumption of raw materials and promote recycling and reuse wherever possible. Monitor, and reduce wherever practicable, the levels of harmful emissions. Design energy efficiency into new buildings and manage energy use in all operations. Seek opportunities to use renewable energy. Seek to minimise the environmental impact of our transportation operations. Support, through environmental trusts, the promotion of environmental awareness by relevant external groups and organisations. Provide necessary training, information and support to staff to assist them in implementing this policy. By the adoption of this policy contribute to sustainable development.
