

# 4<sup>TH</sup> GRADE NEWSLETTER

January 12– January 16

## What's ahead...

### Reading & Language Arts

Next week fourth grade will continue our chapter on inventions. We will practice the skill of using context clues to better assist in word knowledge and overall comprehension.

### Mathematics

Our class just learned how to multiply a multidigit number by a single digit number. We will now move a step further and learn how to multiply a two digit number by another two digit number. This is a challenging new skill for fourth grade so be sure to motivate your child to practice at home using the homework!

### Science/ Social Studies

We will now begin to assemble our history fair boards. Please send a 36-inch by 48-inch board (boards are available at Target & Walmart) with your child by Tuesday, January 13. Also make sure they have printed out the information for the board. Bring any other materials needed such as glue, boarders, and construction paper. I will assist students in class all next week.

## Spelling words

To assist our students in preparation for the upcoming spelling bee, I will use words from our spelling list for our weekly spelling tests.

deflated, discoveries, dubious,  
ebony, enormous, fragments,  
frustration, fluently, foreign,  
fabulous

## Upcoming Events
