

Mrs. Reema's 3rd & 4th grade

Dear Families,

Can you imagine school has been in session for a month? We have 9 months to go until summer break but rest assure you, each and every student will grow and blossom to a bright and amazing learner by the end of the year.

For next week we will be working very hard in math; we will be moving from basic multiplication to more complex double-digit numbers. We will also go over money count with solving problems, number patterns in math and understanding length of time elapsing.

For ELA subjects, we will be explore different types of writing, giving examples such as friendly letters, descriptions, personal narratives, research reports, biographies and so on. We will also review nouns and pronouns.

In Science, we will explore the life cycle of different plants and animals

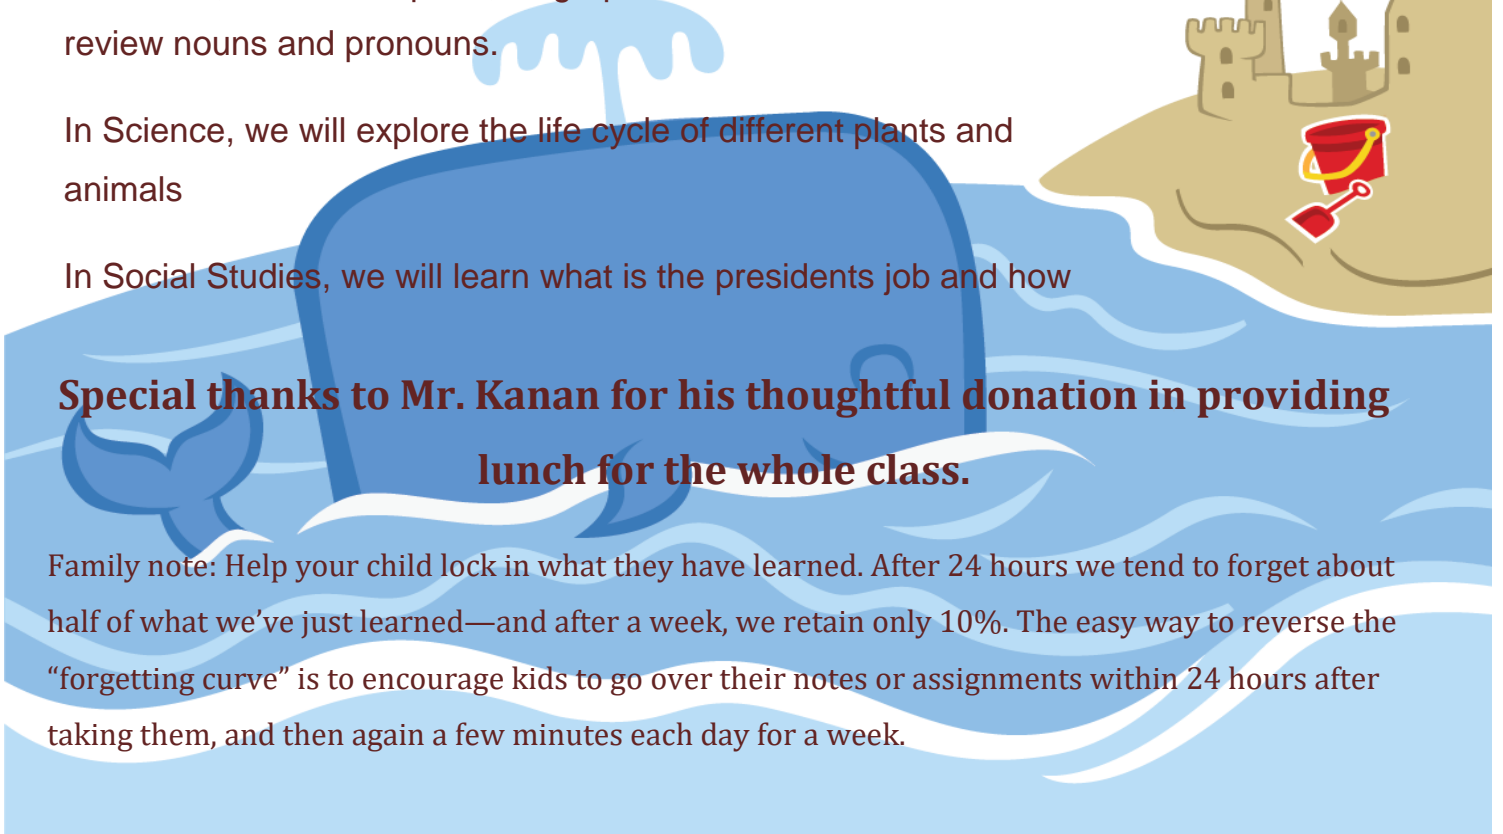

In Social Studies, we will learn what is the presidents job and how

Special thanks to Mr. Kanan for his thoughtful donation in providing lunch for the whole class.

Family note: Help your child lock in what they have learned. After 24 hours we tend to forget about half of what we've just learned—and after a week, we retain only 10%. The easy way to reverse the “forgetting curve” is to encourage kids to go over their notes or assignments within 24 hours after taking them, and then again a few minutes each day for a week.

REMINDERS

- READ EVERYNIGHT FOR 20-30 MINUTES
- SCHOOL BEINGS PROMPTLY AT 8:15 AM
- PLEASE BRING A HEALTHLY SNACK FOR SNACK TIME
- PRACTICE MATH FACTS EVERNIGHT

Class News
Week of September 24, 2018

can we become a president.
