

Mrs. Amal's Science Weekly Newsletter

Week of Jan. 28-Feb 1, 2019

Assalamu Alaykum Parents,

I would like to thank all the students on doing such a great job on their science fair projects. Overall, everyone did well and I am very pleased with how much effort and time they took on their projects. I would also like to thank the parents for their help and support. Many students received a lot of help from the parents. I would also like commend the students who did well on their report cards. Please continue to do well and for all the students to continue to strive and study to get good grades. Next Thursday, Jan 31, 2019, we will have our annual breakfast for honor roll students. Great job to those honor roll students and keep up the good work.

For next week, our 5th and 6th graders will have a test on the climate and atmosphere unit. Unfortunately, the unit test was not given this week due to the science fair. We will go over the study guide on Monday and go over any questions for the test on Tuesday. We will also start a new unit called Earth's changing face. We will start reading this unit on Wednesday and continue on Thursday and Friday. On Thursday, we will watch a video and do a worksheet in class related to the video.

For 7th and 8th grade, we will start a new lesson on chemical and physical properties of matter. We will continue this subject from last week. We will take notes and do an inclass activity. On Friday will be quiz day on the lesson.
