

Mrs. Amal's Science Weekly Newsletter

Week of Feb 4-Feb 8, 2019

Assalamu Alaykum Parents,

I hope everyone stayed warm in this very cold weather we had. I hope students used these past few days to study and make up any assignments. Next week we will focus on getting back on track with new lessons that were missed from this week. We will finally start on the new booklet for the 5th and 6th grade science. The booklet is called "Earth's changing face". The new lesson will talk about the earth's structure. We will also learn about the rock cycle, forming landforms, and what causes earthquakes. We will read the booklet first in class then watch a video. I will also have an activity ready in class during the week.

For the 7th and 8th grade science class we will finish going over chemical and physical properties of elements. Then we will go back to chemical equations. We will learn how to balance equations. On Friday there will be a quiz on the lesson. This will be the last quiz before our first test of the third quarter.
