

4TH GRADE NEWSLETTER

What's ahead...

Reading & Language Arts

We will begin our first unit in our new iready reading curriculum. This curriculum is more aligned with the Illinois Common Core standards. Our first lesson is entitled *Its a Mystery* and the skill we are focusing on is summarizing and using clues within mysteries.

Mathematics

On Monday we will have an in class review for the math quiz on Tuesday, November 4. Our following lessons will explore multiples and factors, factor pairs, and prime and composite numbers.

Science/ Social Studies

We will continue our science unit with further exploration of waves, energy, heat, and collisions. I am aiming to wrap up this unit and have an exam the following week. We will then begin doing some in class experiments in order to reinforce the scientific method in preparation for the science fair.

November 3– November 7
