

4TH GRADE NEWSLETTER

December 8 – December 12

What's ahead...

Reading & Language Arts

Due to Iready testing, we will postpone our reading quiz to Monday, December 8. We will continue with our unit on Tuesday. Together we'll connect all the prior skills learned within the unit these past weeks to review and have a unit test. These skills including finding theme, making inferences, summarizing, and describing character traits.

Mathematics

Our class will have a math lesson 10 quiz on Tuesday. This will be based on the information learned this past week including solving multi step problem and division with remainders. Afterwards, fourth grade will review and prepare for the math unit 2 test which we'll take the following week.

Science/ Social Studies

Science Fair projects will be due Monday, December 8! All projects that are not handed in on time will have points deducted. We will use science time this week to present the science projects to the class. Each student will present his/her project to the class. Be sure to practice with your child at home. I will be graded posters strictly based on the rubric and I'll ask many questions during presentations. Good luck to my little scientists!

Spelling words

Suffix -ed Suffix -able Prefix -un
approachable, devise, devising, execute,
peripheral, reason, reasonable, suggest,
suggesting, unapproachable

- *Do not forget to read for 25 minutes every evening!*
- *Please have 5 sharpened pencils ready for school every day.*
