

4TH GRADE NEWSLETTER

November 24 – November 25

What's ahead...

Reading & Language Arts

Next week we will have a mini unit on poetry. Students will explore different types of poetry. They'll even become poets themselves on Tuesday when they write their own poetry.

Mathematics

Next week we will review all information from our unit thus far. Tuesday we'll have a mid-unit assessment. This will be on prime & composite numbers, factors and factor pairs. This is a longer test and we'll be using Monday as a review day to study.

Science/ Social Studies

For Social Studies our class will be reading more about the branches of government. We'll also do some in class activities to further enhance our understanding of the branches of government and our valued system of checks and balances. I'll also be dedicating some time to science project assistance. This will be the time for questions and guidance if needed.

Spelling words

No spelling words due to the short week. Please dedicate this time to the science projects!
