

4TH GRADE NEWSLETTER

December 1 – December 5

What's ahead...

Reading & Language Arts

We are on lesson 4 of our *Facing Challenges* Unit. This lesson is all about imagining possibilities. Students will learn how imagination can help people deal with real life challenges. Our focus skill will be describing characters.

Mathematics

We will be modeling and solving multi step problems in math this upcoming week. This is crucial in setting up the foundations of algebra. Please encourage your little one to ask questions if needed since this is a very important skill they will need to fully grasp.

Science/ Social Studies

I will be dedicating 40 minutes every day this week to assisting students with their projects. Students are encouraged to bring their material lists, results, conclusions, and bibliographies to review with me one on one if needed. I will allow assistance now however, once the science projects are due I will be grading strictly by the rubric. Good luck scientists!

Spelling words

Suffix -ed Suffix -able Prefix -un

We will begin to follow the spelling words given through the iready curriculum.

adventured, adventures, environmental, environmentalist, expected, imagination, possibility, possibilities, unexpected, unimaginable
