

4TH GRADE NEWSLETTER

September 29–October 3

What's ahead...

Reading & Language Arts

We will delve into a new genre this week called tall tales. A tall tale is a humorous story about impossible or exaggerated happenings. The tall tale we will explore this week is called *Stormalong*. I believe 4th grade will enjoy this lesson inshallah.

Mathematics

We will continue with our unit and move on to different strategies for adding whole numbers. Together we'll explore different ways and methods to add whole, multi digit numbers. **We will have a quiz on this lesson on Thursday, October 2 inshallah.**

Science/ Social Studies

For social studies this week our fourth graders created a visual poster of an assigned region and presented it to the class following the guideline of a rubric. Next week we'll further explore these regions and discuss the climate of each region in detail.
