

Mrs. Amal's Science Weekly Newsletter

Week of April 8-12, 2019

Assalamu Alaykum Dear Parents,

Welcome back students! Hope everyone enjoyed their spring break and got a fresh start this week. I want to remind parents that next week is the Arabic Spelling bee competition. It will be held on Thursday April 11, 2019. If anyone has any questions please feel free to ask Mrs. Sawsan who is in charge. There will also be a PTO meeting if anyone is interested in attending.

Next week we are continuing our lesson on Force and Motion for 5th and 6th grade. We will continue learning about Newton's three laws of motion. We also learn about Kinetic and Potential energy. I will have the students do some activities on the lesson. There will be homework assignments given to students as well.

For 7th and 8th graders we will actually start our new lesson on weather. This week we learned about wavelengths and frequencies. We also learned about sound waves and light waves. We will try to start the new lesson on weather. We learn about different types of weathers like snow, rain, and sleet. We also learn about how volcanoes, tornadoes, and hurricanes are formed. There will homework assignments and weekly quizzes on the lesson.
