

Welcome to the Math & Science 2020-202 Class!

My name is Ms. Batoul Mousa. I held a Bachelor's degree in science from Northeastern Illinois University in 2020. I am an aspiring Math & Science class teacher!

I am excited to have your child in my science and math classes during this academic year. Science and Math classes can be intense and more stressful due to Covid-19 pandemic education plan. However, with your support and your child mindfulness, hard-work, and ambition, I will make ensure that your child will understand the concepts well and thoroughly.

During this school year, there will be announced or unannounced quizzes, activities, and tests regarding the material that was covered before. It is encouraged to read prior the classes for better understanding of the concepts.

My goal is to make sure the students learn the most in a productive and an effective way.

Required Materials:

For Math: A notebook

For Science: A notebook, blue and black pens.
