Commissioner Updates

- DC Water Boil Water Advisory affecting portions of ANC 3A on June 12-13: A power outage June 12 at a pumping station caused low water pressure and required testing for possible contamination. No contaminants were found in the water and the Boil Water Advisory was lifted the next day, with instructions for affected residences to run tap water for 10 minutes and discard any water or ice from the time of the advisory.

- Pepco Power Outage June 12-14 at Berkshire-Greenbriar: A power line was severed during roadwork at Ward Circle. Pepco brought in generators to serve the buildings but they could not maintain continuous electric service during the repairs. Commissioners will share background and take questions and comments.
