

FEMALE GUN HANDLERS

I've been fortunate to train hundreds of men, women and children throughout my career. Too many women underestimate themselves. That is a shame because I've seen many women throw caution to the wind and out perform their male counter parts. However, men have similar concerns. No one wants to fail or look stupid. All simply need a safe environment to reach their potential. Regardless of sex or age, confidence and willingness to show a little vulnerability and be open to experienced instruction is what it takes to become a competent shooter. I am committed to offering that in mixed and women only classes. For those with the confidence to show up for a course, the Tactical Pistol Operator is the place to start. The name of this course may seem to be above a novice's level; however, the course design allows for first-time shooters to be able to train alongside shooters with decades of experience. No one is left wanting and no one is left behind. You are able to work at your own skill level and progress from there. For those who don't feel ready for such a course, please watch my website for a combination at-home video course that culminates in a half-day range session for novice pistol enthusiasts.
