Vision of Lesson Plan Book

The lesson plan material provided in this book, is designed to aid you in instructing your students with important & pertinent material, as outlined by the FAA in part §61.

The various lesson plans follow the requirements in 14 CFR part §61, this provides a lesson plan on every requirement. Thus, you as the CFI will feel confident you are teaching and providing the essential information to your student.

This book provides well thought out lessons to teach the various requirements; it is not a syllabus. There are many wonderful syllabuses available for course structuring.

This book will help you teach exactly what should be known for each requirement; in a structured, easy to follow method, while having all the important material right in front of you & your student.

References in Lessons:

References at the end of a lesson provides information of where the lesson material was discovered

Lesson Plans rely heavily on reference integration to insure the correct information is being presented for you
