State-of-the-Art Manufacturing

Precision begins at our production line. Our facility ensures consistent quality, hygienic handling, and exact nutrient blending – giving you feed that performs batch after batch.

Formulation

With Dr. Lee's Korean expertise and the guidance of leading Indian veterinarians, the feed is specially formulated to meet the unique needs of Indian pig for better health and productivity.

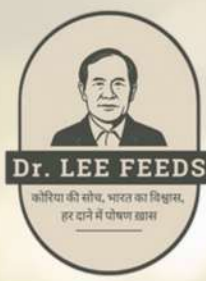

Aflatoxin Controlled

Our Aflatoxin Controlled Swine Feed is specially formulated to safeguard pigs against harmful mycotoxins, ensuring healthy growth, strong immunity, and better feed conversion. With stringent quality checks and advanced toxin binders, it supports piglets, growers, finishers, and breeding sows alike—delivering safe nutrition, improved productivity, and higher farm profitability.

About Dr. S.K. Lee

Dr. S.K. Lee, a Korean national, is a seasoned expert in veterinary medicine with over 40 years of experience in cattle, swine, and poultry. Since 1984, he has worked extensively across marketing, sales, feed production, farm management, organizational strategy, training, and livestock health solutions. With nearly 10 years of experience in the Indian feed industry, Dr. Lee has developed a deep connection with India, working closely with farmers, dealers, and organizations. Known for his technical expertise, strategic vision, and people-focused approach, he continues to empower the livestock sector by combining global best practices with practical, hands-on knowledge.

डॉ. ली स्वाइन ब्रीडिंग प्रोग्राम

1. गेस्टेशन सो फीडिंग प्रोग्राम

Features	Benefits
➤ Specially designed to increase number of Piglets/Sow ➤ Vitamin D3 Enriched Feed ➤ Protein and energy balanced feed enriched with critical amino acids, vitamins and minerals.	➤ More number of piglets/Sow ➤ Ensures healthy skeletal development and prevents lameness in Gilts and Sow ➤ Helps in development of mammary glands and reproductive system of the sow.

Dr. Lee Swine Fattening Program

Starter phase: Weaning to 25 kgs body weight

Grower phase: 55 kgs to 60 kgs body weight

Finisher phase: 55-60 kgs to market size

Features

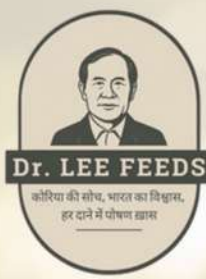

- Highly palatable and digestible feed
- Mycotoxin controlled feed
- Enriched with vital enzymes

Benefits

- Stimulates feed intake and helps in nutrient absorption
- Reduced mortality and increases animal performance
- Improves gut health and reduces pathogen growth in the gut.

Bokdon Starter Feed

Age Group: Weaning to ~10 weeks (7–25 kg)

Formulated to ease the transition from milk to solid feed and ensure strong early growth.

- Highly digestible proteins for fast weight gain
- Strengthens immunity and gut health
- Reduces post-weaning stress and mortality

Bokdon Grower Feed

Weight Range: 25–55/60 kg

Supports uniform muscle growth and frame development during the rapid growing phase.

- Balanced amino acids and energy for lean tissue growth
- Promotes strong bones and body conformation
- Optimized for feed conversion efficiency

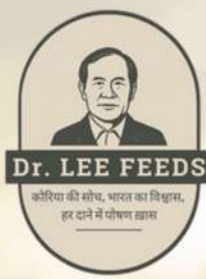

Bokdon Finisher Feed

Weight Range: 55/60 kg – Market Size

High-energy nutrition for faster finishing, better meat quality, and maximum returns.

- High-energy formula for fast finishing
- Enhances meat quality and uniformity
- Delivers excellent feed-to-gain ratio

Bokdon Gestation Feed

From conception to 7 days before farrowing

Specially designed to support sow health and fetal development without excessive weight gain

- Maintains ideal body condition
- Enhances fetal growth and survivability
- Reduces farrowing complications

Bokdon Milking Feed

From 7 days before farrowing to the next service (artificial insemination)

High-energy formula to support milk production and recovery post-farrowing.

- Boosts milk yield and quality <
- Supports sow body condition <
- Encourages higher litter weights and weaning success <

About Dr. Lee Feeds

At Dr. Lee Feeds, our belief is simple: healthy animals make happy farmers. With decades of expertise, advanced processes, and strict quality control, we deliver safe, consistent, and highly nutritious feed.

Guided by science, care, and trust, we are committed to empowering farmers and raising the standards of Indian agriculture to global levels.
