## About Us

*Originally started as Master Safety Inc., our company mission has always remained the same. Provide carriers the professional support and guidance they need to focus on what matters.*

*Over the years, we have grown to add a medical drug testing consortium Master-Med LLC, a technology product company, National Transportation Partners LLC, an Insurance and Claims Department, and even an office with international reach.*

*While we have diversified to provide a wider array of services, our commitment to quality, prompt, and professional services has always remained the same.*

*To our clients, and America's truckers*

# Safety Consulting

Full **Safety Consulting** offers individual or all-encompassing safety programs to assist carriers with safety programs.

For inquiries – [Kamil.p@safetypartners.org](mailto:Kamil.p@safetypartners.org)

## Logbook Auditing

- Logbooks will be checked for correctness, missing logs, form and manner violations, driver's hours, etc. Reports are sent after the check is completed, showing which driver received what violations, during a set time period. Logbooks should be brought in at least every 2 weeks, and no longer than a month after the current date.
- With ELD implementation, Log Auditing is geared towards the active checking of driver logbooks using our ELD software. For companies not enrolled in our ELD services, logbooks will be required from the company, with the addition of supporting documents (BILLS OF LADING, FUEL, ETC.) These logbooks will be checked for falsification, comparing fuel and stops to the logbooks supplied by the driver.

## Preparing and Organizing Documents

- Using provided information, Master Safety Inc will create maintenance folders for each unit, using the Registration, Annual inspection, and lease agreement. A sample maintenance schedule will be included in the unit files; however, each company can provide their own. Any paperwork such as repair receipts, lease agreements, annual inspections, and registrations, will be kept in each file.

## New Driver Processing

- New drivers will have the opportunity to fill out our driver application. The fee without our safety services is \$80 per application, but is included in the weekly safety price, even if the driver is not hired. We also verify the previous employment history each driver lists in his or her application. Finally, medical card verification is also included
  - MVR and Drug Screen can be completed separately. Separate cost may apply\*\*

## Representation before the Department of Transportation during time of Audit

- When your compliance review or safety audit arrives, Master Safety INC will prepare all driver files, logbooks, and any provided maintenance information to be presented at the audit. Master Safety Inc will personally be present during the appointment. There is no additional cost for either of these reviews.

## In Person or Phone Consultation Services

- Weekly safety gives every client access to our consultation services. From disputing violations utilizing DATAQ's, to pulling accident reports, safety clients are always welcome to call us with questions.
  - Please Note: We will require your DOT # / PIN in order to access the information on your FMCSA profile.

**Email or call for pricing.**

# Technology

Founded in 2017, National Transportation Partners LLC brings to market an advanced AOBDRD | ELD solution, for carriers to comply with federal Electronic Logbook Regulations. Our own dedicated team of experts can advise on even the toughest of questions regarding compliance, and technical expertise.

Our team also specializes in marketing electronic devices for GPS asset tracking, dash-cameras for road safety, and Transportation Management Software. Technology is at the forefront of innovation, and we believe no carrier should be left behind.
