About Us

Originally started as Master Safety Inc., our company mission has always remained the same. Provide quality assistance regarding client operations, document preparation, and credential acquisition.

Over the years, we have grown to add a medical drug testing consortium Master-Med LLC, and a technology product company, National Transportation Partners LLC.

While we have diversified to provide a wider array of services, our commitment to quality, prompt service, and appreciation for the transportation industry has and always will remain the same.

*To our clients, and America's truckers
Thank you!*

Find Us On

Safety Consulting

Among the oldest services offered by Master Safety Inc, our Full **Safety Consulting** offers individual or all-encompassing safety programs to assist carriers with their safety fitness. Our Safety Department has over a decade of experience, having represented clients in hundreds of audits.

For inquiries – Kamil.p@safetypartners.org

Logbook Auditing

- Logbooks will be checked for correctness, missing logs, form and manner violations, driver's hours, etc. Reports are sent after the check is completed, showing which driver received what violations, during a set time period. Logbooks should be brought in at least every 2 weeks, and no longer than a month after the current date.
- With ELD implementation, Log Auditing is geared towards the active checking of driver logbooks using our ELD software. For companies not enrolled in our ELD services, logbooks will be required from the company, with the addition of supporting documents (BILLS OF LADING, FUEL, ETC.) These logbooks will be checked for falsification, comparing fuel and stops to the logbooks supplied by the driver.

Preparing and Organizing Documents

- Using provided information, Master Safety Inc will create maintenance folders for each unit, using the Registration, Annual inspection, and lease agreement. A sample maintenance schedule will be included in the unit files; however, each company can provide their own. Any paperwork such as repair receipts, lease agreements, annual inspections, and registrations, will be kept in each file.

New Driver Processing

- New drivers will have the opportunity to fill out our driver application. The fee without our safety services is \$80 per application, but is included in the weekly safety price, even if the driver is not hired. We also verify the previous employment history each driver lists in his or her application. Finally, medical card verification is also included
 - MVR and Drug Screen can be completed separately (MVR - \$28 | Pre-Employment Drug Test - \$58)

Representation before the Department of Transportation during time of Audit

- When your compliance review or safety audit arrives, Master Safety INC will prepare all driver files, logbooks, and any provided maintenance information to be presented at the audit. Master Safety Inc will personally be present during the appointment. There is no additional cost for either of these reviews.
 - Additional documentation may be requested from the carrier during the time of the audit | review.

In Person or Phone Consultation Services

- Weekly safety gives every client access to our consultation services. From disputing violations utilizing DATAQ's, to pulling accident reports, safety clients are always welcome to call us with questions.
 - Please Note: We will require your DOT # / PIN in order to access the information on your FMCSA profile.

Safety Packages and Pricing

Starter Package *(Call us today for flat monthly rate subscription pricing)*

- DOT related phone support
- DataQs Violation Disputing
- MCS-150

Legal Help

We know life on the road is hard enough, especially with all the recent new rules and regulations. Let us worry about finding you the best legal help possible for any tickets you get behind the wheel. Whether it's a moving violation in your car or truck, an overweight ticket, or any fine, we can help. You handle life on the road, let us handle the rest.

For inquiries – Claims@safetypartners.org

- **Citations / Fines**

- Pricing dependent on variables involved, jurisdiction, severity of offense(s).

- **FreightGuard™ Negative Report Assistance**

- Has a broker hurt your business with a negative FreightGuard™ report and is refusing to pull it down? We can help get it removed so you can get back to finding the highest possible paying loads from as many different sources as possible.
- Cease and Desist Legal Letter - \$500

Is your driver record tarnished by tickets and violations? Is your carrier score affected by negative inspections? See how MS SAFETY PARTNERS LLC can help improve your records by assisting with:

- Speeding Tickets
- Overweight Tickets
- Citations
- Violations

Technology

Founded in 2017, National Transportation Partners LLC brings to market an advanced AOBDRD | ELD solution, for carriers to comply with federal Electronic Logbook Regulations. Our own dedicated team of experts can advise on even the toughest of questions regarding compliance, and technical expertise.

Our team also specializes in marketing electronic devices for GPS asset tracking, dash-cameras for road safety, and Transportation Management Software. Technology is at the forefront of innovation, and we believe no carrier should be left behind.
