

SK 800 MK2

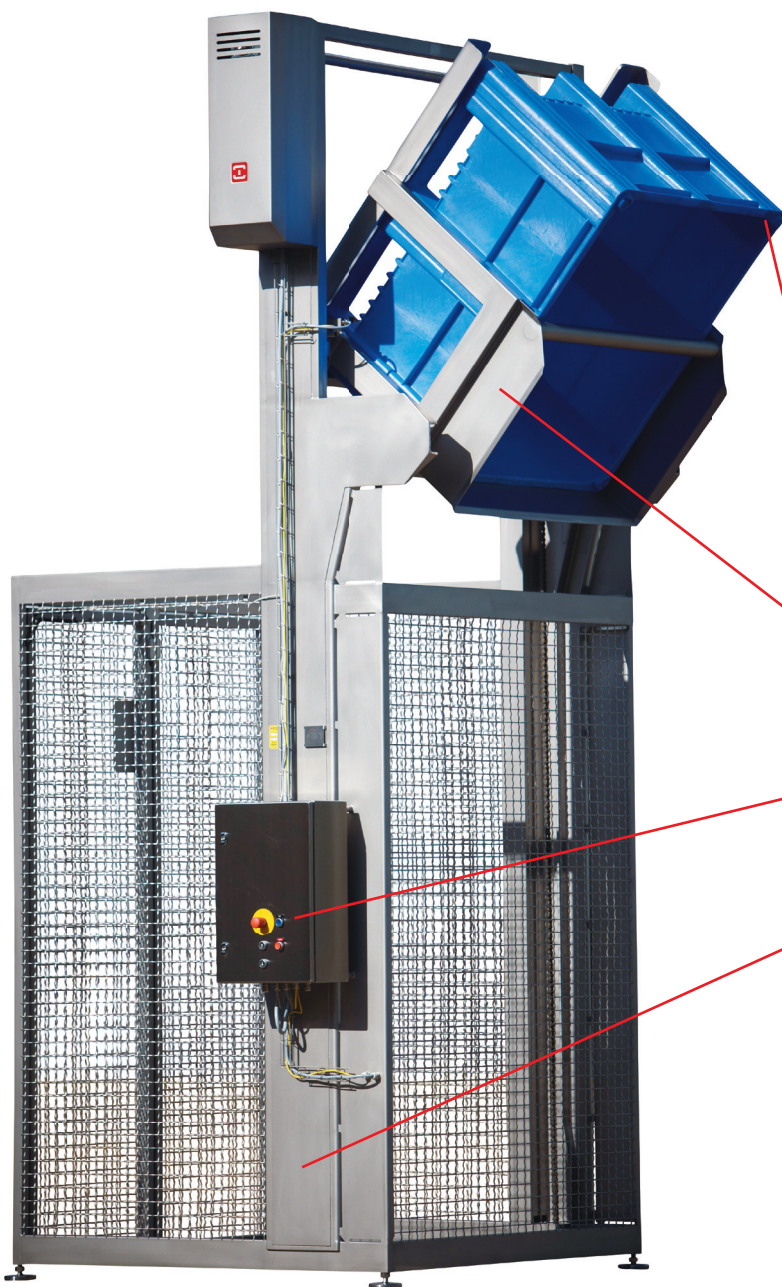

- Hygienic design
- Flexible to integrate
- Safe to handle

MK2 – the new generation twin-column lift

The twin-column lift is used to lift and tip raw material into a production line in a safe and efficient way. The system contains a full range of solutions to integrate and adapt to different situations, containers and hoppers. The MK2 is the optimum way to tip material wherever needed, if space is tight, in multiple containers or when the requirements are high. As a bonus the system has a modern and efficient design, it is easy to clean and low on maintenance.

The MK2 is available as standard in many versions:

- Bolted or mobile on a rail
- Left or right handed
- Any tipping height needed
- Straight or side tipped
- Always in stainless steel execution
- Low built version available

- In standard execution the tipping angle are 40 degrees, but can be increase to 70 degrees if needed.
- The lifting frame is easily adapted to handle both containers and the standard 200 liter trolleys.
- The controls and power inlet is integrated in the column which makes them protected from being damaged.
- The modern design of the MK2 is focused on hygiene. The smooth sides together with full welds all over, makes it very easy to clean.

Main features

- The electrical cabinet is mounted on distances in order to give easy access for cleaning purposes.
- The tipping height is adapted for the purpose.
- If needed the lifting frame can be design with a chute designed to lead the product clean, safe and gentle to the intended position.
- The chain is easily checked, adjusted and greased from the opening in the columns.
- The overall design is intended to make the cleaning as easy as possible.
- The automation level is decided of the need. From the standard execution with push-buttons it is easy to up-grade the unit with automatic features, since the main of the body already is equipped with a safety guarding.
- When installing the bolted version column it's very easy to make it level due to the adjustable machine feet.
- We have a full range to handle different weight capacities from 200 – 3000kg.

More than 50 years

We have been focusing on the many challenges of product handling in the food industry for over half a century. All the experience and know-how we have amassed puts us a step ahead of our competitors. This is apparent in our innovations, the width of our range and in our quality.

Today we can guarantee a production capacity that goes beyond the norm, regarding the supply of machines and spares - the latter often leaving our warehouse the same day as ordered. In addition, we adapt every machine to your wishes and offer complete solutions tailored exactly to your situation.

We create safety and stability in your production systems and add further weight to your customer promise. The domain of our activity ranges beyond Europe and continues to grow. Our focus is a combination of fast service and high quality and will be more than just a promise also in the future.
