RE: Letter of Recommendation for the Berghammer Builders

I have been asked to write a letter of recommendation for Berghammer Builders, who has performed the engineering, design, general contracting and construction for the Clayton school as well as the Amery School District over the past 15 years. Berghammer Builders has worked for the Clayton School District and the Amery School District while I was the Director of Buildings and Grounds at each. Let me begin my recommendation for Berghammer Builders by stating that they are one of the most outstanding general contracting firms I have ever had the privilege of working with in my 16 years in Public education.

Berghammer's employees are consummate professionals who consistently strive to be able to meet the needs of a school district, its students and its teachers. A lasting first impression for me personally was their willingness to work with us in the directions we, were looking to go, i.e. design, equipment, etc.

One of Berghammer's innate abilities is to always be on the lookout for ways to improve the effectiveness of the entire building. Their ability to analyze current practices and find more efficient ways to meet the needs of maintaining the district facilities was exceptional. They also have an uncanny ability to negotiate the best deal for the school district when it comes to the construction process.

As I stated previously, Berghammer's personnel pose outstanding communication skills and have the uncanny skill and ability to analyze situations and develop innovative and common sense solutions to any situation they encounter while meeting their responsibilities. They accomplish this with highly qualified employees and seem to have employees that are very good in many facets. Their ability to see the big picture is an extraordinary attribute as well. We always keep their number at close reach, with their ability to critically analyze situations proving invaluable to our efforts in maintaining our Districts buildings. They are outstanding team player's and have always looked out for the best interests of our students, staff, and the employees that work here.

The mission of the School District of Amery is to foster academic excellence, life-long learning and citizenship.

I often sought out their advice on other issues related to the school district even if they are not in their area of expertise because they are thoughtful and thorough in analyzing any situation. Berghammer's people skills are just exceptional! They understand the management of contracts including the interpretation of contract language, the crucial time frames and how to apply the contract fairly and consistently to all the individuals involved.

Berghammer Builder's, being leaders in cutting edge design and quality construction are highly respected by all involved with our committees and the community. Our community and staff have benefited immeasurably from their expertise and professionalism. They are an exceptionally motivated, highly personable and qualified company.

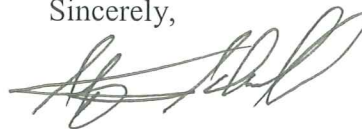

I would strongly urge you, if provided the opportunity, to employ Berghammer Builder's without hesitation. They will absolutely make an immediate and definitive impact on your school district if given the opportunity.

Sincerely,

George Sigsworth
Building Maintenance Director
School District of Amery

Sincerely,

Stephen Schiell
District Administrator
School District of Amery
