Liquid & Dry Extract

Spray Dried Powders

Spray Dried Fruit & Vegetable Powders

WHAT ?

Spray drying is a common method used to turn liquid substances into dry powders. Spray-dried powders are typically produced by first mixing a liquid solution or suspension with a drying aid, such as maltodextrin or lactose, before feeding the mixture into a spray dryer.

In the spray dryer, the mixture is atomized into small droplets and introduced into a heated chamber where hot air is rapidly circulated. As the droplets fall through the chamber, the hot air evaporates the liquid, leaving behind a dry powder.

Spray-dried powders can be used in a variety of applications, such as food and beverage, pharmaceuticals, and cosmetics. They have a long shelf life, are easy to transport and store, and often have improved solubility and stability compared to their liquid counterparts.

ABOUT US!

Namashram Industries is a well-established market leader in the manufacturing of essential oils and spray-dried powders and extracts. The company has built a strong reputation for its high-quality products and commitment to customer satisfaction.

Namashram Industries uses the latest technologies and processes to manufacture essential oils, powders, and extracts from a variety of natural sources such as herbs, spices, and fruits. The company's state-of-the-art manufacturing facility is equipped with modern machinery and equipment, enabling it to produce high-quality products consistently.

One of the key strengths of Namashram Industries is its extensive knowledge of the natural ingredients used in its products. The company has a team of highly skilled experts who are knowledgeable about the properties and uses of each ingredient. This expertise allows Namashram Industries to create unique and effective formulations that meet the needs of its customers.

Namashram Industries also places a strong emphasis on sustainability and environmental responsibility. The company sources its raw materials from ethical and sustainable sources, and it operates its manufacturing facility in an eco-friendly manner.

Overall, Namashram Industries is a highly respected market leader in the manufacturing of essential oils and spray-dried powders and extracts. Its commitment to quality, innovation, and sustainability has enabled it to establish a strong position in the industry and maintain the trust of its customers.

WHY CHOOSE US?

Industry Leader

Namashram Industries is a well-known market leader in the manufacturing of spray-dried fruit and vegetable powders. The company has gained a strong reputation in the industry for its high-quality products and dedication to customer satisfaction.

We use the latest technology and equipment to manufacture spray-dried fruit and vegetable powders from a variety of natural sources. The company's state-of-the-art manufacturing facility allows for consistent and efficient production of high-quality powders.

Our commitment to quality, innovation, and sustainability has enabled us to establish a strong position in the industry and maintain the trust of its customers.

Namashram Industries uses only the finest quality raw materials in the manufacturing of their products. We have strict quality control measures in place to ensure that our products meet the industry standards and set benchmark for others.

We committed to innovation and constantly strives to improve their products and processes. They invest in research and development to bring new and innovative products to the market.

WHY CHOOSE US?

Namashram Industries pays special attention to packaging to ensure safe delivery of its products to customers. We understand the importance of proper packaging in preserving the quality and freshness of its products during shipping and handling.

To ensure safe delivery, we use high-quality packaging materials that are durable and can withstand the rigors of transportation. The company also employs various protective measures, such as cushioning and insulation, to prevent damage to the products during transit.

We are commitment to quality and customer satisfaction extends to every aspect of its operations, including packaging and shipping.

To ensure fast and on-time delivery, Namashram Industries has implemented various measures, such as optimizing its logistics operations by partnering with reliable shipping companies.

The company also maintains a sufficient inventory of its products to meet the demands of its customers and minimize delays in delivery.

Spray Driers

Spray Dried Powder

V/S

Natural Herbal Powder

Benifits of using Spray dried powders over Herbal powders

Water Solubility

Spray Dried Powders are highly soluble in water when compared to herbal powders

More Economical

Spray Dried Powders are Cost Effective when compared to herbal powders because of their higher concentration

Spray Dried Powder **V/S** **Natural Herbal Powder**

Benifits of using Spray dried powders over Herbal powders

Easy To Use & Handle

Spray Dried Powders are more easy to use & More effective than herbal powders

Storage & Transportation is relatively more convenient and cost effective than other Natural powders.

Various Application

Spray Dried Powders can be used in various industries such as Food & Beverages , Cosmetics , Health Care Products etc.

It can serve a large sector in the market.

Fruit Powders

Pomegranate Powder

Pomegranate fruit powder is a finely ground powder made from the dried and ground seeds and fruit flesh of the pomegranate fruit. It is a nutrient-dense superfood that is packed with antioxidants, fiber, vitamins, and minerals. Pomegranate fruit powder can help boost your immune system, aid digestion, and improve heart health. It is a convenient and easy way to incorporate the health benefits of pomegranates into your daily routine, and can be added to smoothies, juices, oatmeal, baked goods, desserts, and sauces for a delicious and fruity flavor. It has a long shelf life, making it a perfect pantry staple for those who want to have access to the nutritional benefits of pomegranates year-round.

Tomato Powder

Tomato powder is a dehydrated form of tomatoes that is commonly used as a seasoning or flavoring in various dishes. It is made by removing the moisture from tomatoes and then grinding them into a fine powder.

Tomato powder can be used as a substitute for fresh or canned tomatoes in recipes such as sauces, soups, stews, and casseroles. It is also used as a seasoning for popcorn, chips, and other snacks.

One of the advantages of using tomato powder is that it has a longer shelf life than fresh tomatoes, making it a convenient pantry staple.
