

About Us

At Stennis Innovations, we believe that great engineering begins with understanding people—their goals, challenges, and vision for progress. With over 25 years of experience In Defense and Aerospace, applications including specialized work in corona free high-voltage systems, cable assemblies, and connectors. We partner with clients across multiple industries to deliver innovative, dependable, and efficient solutions that outperform expectations.

Rooted in the discipline and problem-solving mindset forged through years of U.S. Navy service, we approach every project with diligence and fortitude. Whether improving an existing design or developing a new concept from the ground up, our mission remains the same: to help our clients achieve design excellence while advancing our own knowledge, skills, and purpose.

At Stennis Innovations, we don't just engineer solutions, we build relationships that empower progress.

Mission

To help clients achieve design excellence by transforming challenges into innovative, dependable, and efficient solutions. Guided by diligence, collaboration, and honor, we combine over 25 years of engineering experience with a commitment to continuous growth and mastery, advancing progress through purposeful design and trusted partnerships.

Vision

To be a trusted engineering partner recognized for innovation, integrity, and excellence, empowering others to achieve their goals through purposeful design and collaborative problem-solving.

What We Do

We provide engineering services that transform complex challenges into innovative, practical, and dependable solutions. From concept development, design optimization, to production improvement and system integration, we help clients achieve design excellence with precision, collaboration, and creativity.

How We Do It

Our process is rooted in diligent analysis, close collaboration, and deep technical expertise. By partnering with our clients, we work to design, refine, and deliver solutions that consistently perform in real-world applications. We approach every project with unwavering veracity, resilience, and meticulous attention to detail. This ensures that every outcome meets the highest standards for quality, safety, and long-term reliability.

Why We Do It

Because we are driven by one purpose, to help others achieve their goals while growing in knowledge, mastery, and innovation. We find fulfillment in solving problems, empowering others, and advancing technology through trust and collaboration.

Who We Do It For

At Stennis Innovations, we proudly serve a wide range of clients—from large corporations with complex, multi-layered engineering challenges to small companies seeking practical, reliable, and innovative design support. No project is too complex, and no idea is too simple. Whether supporting established industry leaders or helping growing businesses bring their concepts to life.

Guiding Principles

- **Commitment:** Dedication to achieving excellence while embracing innovation by actively seeking out new ideas and approaches that can enhance our services and deliver greater value to our clients. By embracing change and creativity, we position ourselves to meet future challenges head-on while driving continual improvement.
- **Vision:** Our Vision guides us to thoughtfully anticipate future needs, ensuring that our strategies and actions remain forward-thinking and responsive to ongoing changes in the industry so that we can continually meet the customer's needs.
- **Nobility:** To be virtuous in all our pursuits and committed to doing them with honor, morality and integrity even in the face of adversity. To have a positive impact on all the people we interact with.
- **Synergy:** We believe that strong relationships and cutting-edge solutions are built through collaboration by combining experience, technical expertise, and client insight. By working closely with our partners, manufacturers, and customers, we foster an environment of trust, shared purpose, ensuring we are all working in a unified direction. We achieve greater outcomes than any one contributor could achieve on their own.
- **Fortitude:** We remain steady, focused, and unwavering in the face of complex challenges forged through decades of experience and accountability. We do not quit when we hit an obstacle - we solve them through structured execution, clear communication, and an unwavering commitment, to see them through to completion. Every project is mission critical and failure is not an option.
