# Homework and Academic Extension Policy

## 1. Introduction

At Passion Education Ltd, homework is defined as learning which extends beyond the classroom. It is a mechanical necessity for reinforcing the **APEX Framework** and moving a student from an academic plateau to total mastery. This policy outlines the expectations for students and the role of high seniority staff in managing home based academic extension.

## 2. The Pre Surgical Mandate

The success of our **100% live tuition** model relies on the "Pre Surgical Mandate".

- **Submission Deadlines:** Students must submit all assigned tasks at least 24 hours prior to their scheduled live session.
- **Purpose of Submission:** This work acts as the "raw tissue" for the **Surgical Writing Lab** or subject equivalent.
- **Operational Impact:** Failure to submit work on time prevents the staff member from performing a forensic audit before the lesson, which may compromise the student's progress for that session.

## 3. Nature of Assignments

Every assignment set by the Academy is designed to be diagnostic and meaningful.

- **Forensic Application:** Tasks are created to allow students to practice identifying their own **forensic failure points** independently.
- **Curriculum Alignment:** All work is directly aligned with the **Pearson Edexcel iGCSE or 11 plus** standards to ensure no time is wasted on "busy work".
- **Extension vs. Repetition:** Homework focuses on extending the student's linguistic or logical range rather than simple repetition.

## 4. Feedback and High Seniority Critique

Due to our **8 Max** class size, homework is an opportunity for intensive, individualised feedback.

- **Surgical Review:** During the live session, staff will perform real time surgery on the submitted work, correcting errors and elevating the student's output.
- **Trajectory Tracking:** Results from academic extension tasks are used by the **CEO** and **COO** to monitor the student's upward trajectory.

## 5. Parental Support with Learning at Home

We recognise that parents are essential partners in securing academic success.

- **Environment:** Parents are encouraged to provide a focused, professional environment for home learning.

- **Independence:** While parents provide support, the work must remain the student's own to ensure the **Forensic Assessment** remains accurate.
