1986 ATV PRICE MANUAL

1986 POLARIS ATV SUGGESTED RETAIL PRICE LIST GENERAL INFORMATION

STANDARD SERVICE PARTS

This price list is a numerical sequence listing of the current suggested retail prices of Polaris standard field service parts. All prices listed are for unit of issue quantities of one each. Items marked with (*) are interchangeable with snowmobile parts.

SUBSTITUTIONS

This price book lists all current service parts substitutions. The substitute part (old part number) will have the substitute part (new part number) listed in the description column as SUBSTITUTED BY_____. Refer to the substitute part number for the correct price. Polaris also issues periodically a Deletion and Substitution Service Parts publication which may be useful in service parts identification, ordering, issuing and pricing.

PRICE CODE

This column lists the pricing code for each item. Please refer to your discount code sheet for breakdown of this code.

NEW PART NUMBERS AND PRICES

There are some parts used on new models which may not appear on this price list. These part numbers and prices when they become available will appear in a supplemental price sheet and in a revised reprinting of this price list at a later date. For new part numbers listed which have not yet had a price established, the entry TBA (To Be Announced) will appear in the price column.

PARTS RETURNS

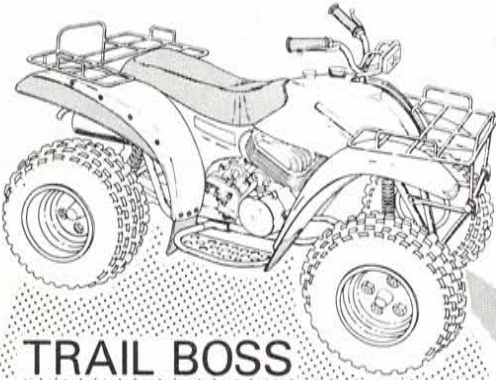

No return of these parts is allowed without the written authorization of Polaris or its distributor. All parts returned must be in a new and saleable condition (properly packed and identified) and returned via prepaid freight. All returned parts are subject to a restocking charge.

All listed prices are subject to change without advance notice.

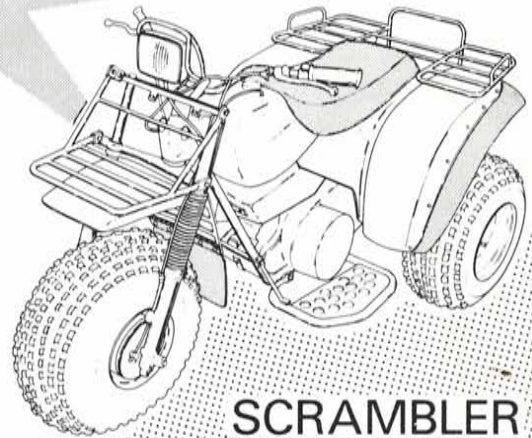

This price list is also available on microfiche.
