DESIGNED FOR THE LITTLE RIDER IN MIND!  
 The ADJUSTABLE HANDLEBARS fit the shortest or the longest arms.  
 The THROTTLE LEVER can be turned for thumb or fingertip control and easily set to limit the top speed to suit the rider's ability.  
 The AUTOMATIC VARIABLE SPEED CLUTCHES allow the novice rider to ride with ease without the bother of shifting gears with his toes.

**The AVENGER BIG FOOT is built for the big job!**

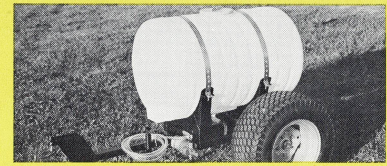

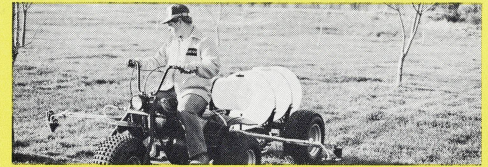

# The Multi-Purpose AVENGER

This AVENGER Big Foot is featured with a 12 volt ELECTRIC BROADCASTER. The BROADCASTER contains a 1.2 bushel hopper, stainless steel agitator, centering pivot plate (for directional broadcasting) and an adjustable flow gate.

This self-contained MICRON BOOM SPRAY SYSTEM features an 11 gallon Poly tank and 12 volt electric fluid pump. The Controlled Droplet Applicator (CDA) nozzles produce uniform micron sized droplets. Boom sizes range from 3'-10' with adjustable heights of 8"-20". The booms articulate to prevent damage to the heads.

## 50 GALLON POLY TANK AND TRAILER

The trailer is equipped with high speed bearings, spindles, high flotation tires and a 12 volt electric, 2 gal. per minute liquid transfer pump. Where added quantities of chemical are needed, this trailer is easily pulled behind an AVENGER and can be used as the primary tank. The trailer can be easily disconnected and left in a field to be used as a nurse tank.

This AVENGER 300 is shown with a canvas "buggy top" CANOPY which can be easily adjusted to shade the driver. The self-contained SPOT SPRAYING SYSTEM uses an 11 gallon Poly tank, 12 volt electric fluid pump, and an 18" hand operated wand with an adjustable tip.

FRONT SKI affords the rider three-wheeling fun in the snow.

This AVENGER Big Foot is equipped with a carryall MAGNUM CARGO RACK. The FRONT RACK attaches easily to the front fork for extra carrying capacity.
