

UT-10 **Utility Truck**

The Alsport Quarter-Ton Dump Truck is now working in Industry and Agriculture across the country. You will also see it pulling gang mowers, lawn rollers, seeders . . . and other lawn care equipment on estates as well as in suburbia.

Then you will see it working in the fields, running fences, setting salt blocks, carrying a calf . . . and how many more jobs can it do on a major ranch? And how about climbing the high hill to check your avocado trees at the top? The **UT-10** can do it.

And you will see it pulling a golf ball picker for collection on the driving range, and also used as a runabout for the greenskeeper.

Take your welder or generator to the job site. Use it to pull a car, truck, out of the mud or snow. Take it to the back 40 to chop trees . . . and then drag them where you want to cut 'em up. There's an infinite number of work applications the **Alsport Utility Truck** can do beyond what we can think of.

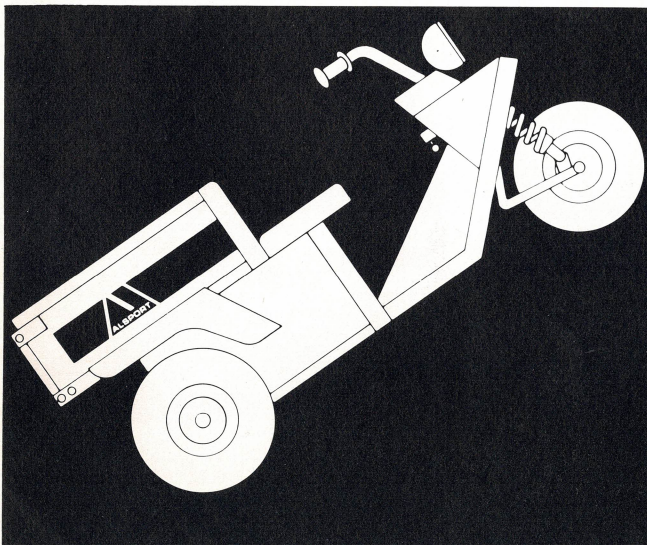

The **UT-10 Dump Truck** is quiet . . . and it is smooth. It is fully suspended at each wheel with hydraulically dampened shocks assisted by coil springs. All shocks are fully adjustable for ride control.

The engine is a cast iron block 10 HP work horse. And driving the **Alsport Utility Truck** is pure simplicity as provided by the twin transmissions. You have forward and reverse maneuverability and no clutching because of the automatic torque convertor. Braking is dual hydraulic discs on the rear axles. The **UT-10** comes with electric starting, headlight, taillight . . . and the alternator is 20 amps @ 12 volts. The gas tank has a three gallon capacity for many, many miles of work and travel on regular gas (no premixing).

The dump bed has over 8 cubic feet of load capacity. The tail gate swings open . . . and the bed is counterbalanced for easy lifting to empty a load of stones, or whatever. And for ruggedness . . . it's all built on a 1½" dia. tubular steel frame.

Take a ride on it — it seats two. Give it your own work test. Then sit down and list the many jobs you have to justify such a purchase. It won't be difficult.

The **Alsport UT-10 Utility Truck** is one of the many **Economy Transportation Vehicles** manufactured by Alsport Incorporated, 84 Whittlesey Avenue, Norwalk, Ohio 44857. Write to: **Dept. UT**, at the above address for local dealer information.
