

CENTAUR

by **RUPP**

CENTAUR

HALF CYCLE...

You can drive it for kicks 'cause Centaur is bred from bike. An oil-injected 340 cc twin Kohler 2-cycle engine. Electric starter. Handlebar throttle. Hand-operated front brake. That's one half of Centaur. The half that generates the free-wheeling freedom you experience by grabbing a hefty bike and heading for the hills, the flats, or better yet, for the horizon.
