Our sun was a Jupiter-like planet in an older solar system until 4.567 billion years ago. **CLICK IMAGES:** planet sizes, etc.

**NOTE: UPDATE SECTION MOVED HALF WAY DOWN BELOW WITH MY THOUGHTS AND OPINIONS**

**THIS IS MY DISCOVERY STORY**

I'm Mark Clemens, 60 in July 2024, CO, Astrophysicist and Physicist Discoverer, who physically solved God's DNA with time (1 and 2 energy beams on outside of universe/DNA) and the universe to determine there are quadrillions of other Clemeniverses with the same time and universe DNA making up a complex living organism in which we exist (the Higgs boson God particle indicates this is God's DNA) and this is my discovery story. I recently discovered outer space is a Clemenian Cubeverse that split squarely on quadrillions of Clemenian Crossover Dots on Einstein's Spacetime Plane to begin a universe on each dot (see appendices on science notices under Keys to the Universe). At age 5 in 1969, my rocket scientist father gave me textured globes and my thumb was in the moon craters every night as I fell asleep so I know the brail of the planet and craters. It was a cold snowy day February 16, 2016, as I shared my Venezuela Basin Impact Theory from age 6 as a child prodigy and savant (51 at discovery in 2016) as I directed a friend on the phone to Aves Ridge in Google Earth. The smell of pizza permeated the air and then...moon craters everywhere like a pepperoni bonanza!!! Like a pizza pie in the sky...that's amore! I discovered three moon craters with the Caribbean Islands going down the largest moon crater and two moon craters south under South America with reports to NASA and scientists every week. Chewing on a few ideas, "I need something to go with my pepperoni moon craters like maybe meatier meteor showers NASA doesn't know anything about. Matching 12 meteor showers to 16 impact and exit evolution craters (14 more later identified) with Epic Evolution Charts, 100% geologic changes and science research history would solidify my moon craters." And all creation was solved.

Clemens' Comet - Earth, Sun, E... Time&Universe DNA Solved

clemenscomet.com

I immediately recognized that when a Clemens' Comet exited Earth, the exiting debris field became a meteor shower with the middle welding the exact time in history with bread crumbs for the Mark shall inherit the Earth. The pattern of 12 meteor showers and orbits of resultant Clemens' Comets tracked by NASA dictated the look of my Blueprint for Life, 2nd Key to the Universe, which is merely a map of the meteor showers...and black and white holes, actually. After eight weeks of reporting, I presented my science dream team including NASA Administrator, NASA scientists, global scientists (some with T.V. shows), NOAA, ESA and press with two Keys to the Universe. That meant devoted research for seven more years during a seven-year discovery spree, but worth the effort as my discoveries stand the test of time. The impact order changed many times with splits and internal core bounces also with splits and more craters with ongoing discoveries for betterment of science, but challenging for a book. I discovered almost everything Einstein theorized and way beyond with physical proof of his and other scientist's theories as I solved almost every unsolved mystery known to humanity including Clemens' Supernova 4.5 Bya ignited a Jupiter-like planet to become our sun, creating our new solar system with life on Earth at 3:00pm MST March 17, 3.5 Bya in my Small Bang Theory.

The pattern in Epic Evolution Charts shows Clemens' Comet impacts every 1 billion years starting 4.5 Bya at 6:00am MST on August 4, with the first impact at 3:00pm MST March 17, 3.5 Bya creating life and Earth's elliptical orbit in the Gamma Normids Meteor Shower which changed Clemens' Comet impact pattern to every 1.5 billion years. At 2:30pm MST May 5, 542 Mya, the impact pattern changed as Earth's core upgraded to Clemens' Supernova Metallic Diamond Core in the Cambrian Explosion. Earth's old core came back as three moons in the Venezuelan Basin at 8:08:34pm MST November 17, 66 Mya forming today's moon. Earth split like a Venus Fly Trap to create the Mid-Atlantic Ridge (we almost lost our core out the friggin' Himalaya Manhole that luckily closed again saving Earth) that swallowed dinosaurs to the core before closing as Clemenian Polar Gravity rolled Earth to drown survivors in the K-Pg Boundary (dinosaur extinction) creating the Rocky and Himalaya Mountains and Grand Canyon from 8:08:34pm to 8:17:05pm MST November 17, 66 Mya (8 minutes 31 seconds).

The Great Lakes formed at 9:15pm, November 3, 251.9 Mya as a core bounce example of the Gulf of Mexico 66 Mya. At the close of the Cretaceous Period precisely at 9:00:00pm MST, November 17, 66 Mya, waves weren't finished carving the Gulf of Mexico or Yucatan Peninsula as shown by all the empty continental plates (light blue) that lost land as Jamaica, Cuba, Caribbean Islands, etc. sucked down three moon holes. Clemens' Comets operate on Clemens' Atomic Clock. Therefore, at age 6 I debunked a Nobel Prize Scientist (see Keys to the Universe tab). My discoveries are eternal Epic Eon and science backbones proving creation of life, evolution and extinction. I initially debunked three theories (8 total including Einstein's famous  $E=MC^2$ , aka  $MC^2$ ): 1) Chicxulub non-crater K-Pg Theory; 2) Plate Tectonics Theory; and 3) Big Bang Theory purportedly blowing life through all universe changes and sub-freezing radiation for 13.7 billion years through massive cosmic collisions and Clemens' Supernovae to lucky little Earth only. This lead me to solving the DNA of time and our universe through a Key to the Universe I labelled my 100% Accurate Atomic Clock (Key #1 to DNA) as I continued discovering 15 more Keys to the Universe with my new Clemenian DNA Math being Key #16 to the Universe and Key #2 to DNA. My lateral view and description of the DNA on other pages is Key #3 to DNA and Key #17 to the Universe whilst Key #18 to the universe and Key #4 to DNA on other pages is my vertical end-view from the post-helix to the pre-helix with all 10 helices in between including descriptions and sizing between each Clemenian Crossover separating every helix.

**Hey, Einstein, I've got 2 formulas that work better than yours! LIFE = OME where O=OCEAN \* M=MAGNETISM \* E=2T[squared]C (I fixed E=MC[squared] by solving for mass)</p>**

where M = MASS = (4,300 miles-wide cubed)squared, C = LIGHT = 300,000/km second, and T = TIME = 3.1536e+16 (flexes with any seconds

⏏

where  $M = \text{MASS} = (4,300 \text{ miles-wide cubed})^{\text{squared}}$ ,  $C = \text{LIGHT} = 300,000/\text{km second}$ , and  $T = \text{TIME} = 3.1536 \times 10^{16}$  (flexes with any seconds of time)

where  $\text{TIME} = \text{seconds on DNA rungs i.e., convert 1 billion years to seconds as } 1\text{billion}/365/24/60/60$  [per Code of Life at 1 billion years].

The 2 formulas are  $\text{LIFE} = \text{OME}$  and [Fusion]  $\text{Energy (E)} = 2T^{\text{squared}}C$  [GoDaddy can't display superscript] where  $T = \text{Time in seconds/km}$  and  $C = \text{speed of light which is slightly slower than } 300,000 \text{ km/sec}$ . My FE formula calculates the boson when fusion energy is less than 1 and the Higgs boson giving mass to photons when FE is greater than 1; Time1 and Time2 on the outside of our universe then almost collide at 1/2 second to create our universe, the first helix of God's DNA, and light that can now be seen due to repulsing (reflecting) off physical matter and going to Einstein's spacetime plane that magnetically attracts non-mass particles for food. In the formula above, the 4,300 miles wide Earth is cubed for volume and squared since it impacted the same size Clemens' Comet Supernova Metallic Diamond Core, while any seconds can be used from the beginning of the pre-helix to any point throughout all 12 Clemenian physics realms I discovered from pre to post helices. Life as we know it doesn't exist before Rung1 or after Rung5 in any of 10 helices or prior to the 4th helix. My physically proven Small Bang Theory on Earth is also proven by NASA as life exists on Earth only...in our solar system. My theory says to break Einstein's formula by setting  $\text{Mass} = 0$  demonstrating it's a physical restraint becoming applicable after time began verses an energy restraint in giving mass to non-mass particles e.g., Higgs boson, where it doesn't mathematically apply but states "all matter came from energy." The spirit of the law of nature exists for similarly creating life simply by throwing ocean (Clemenian oceans came from cracked Clemens' Supernova Metallic Diamond Cores in Clemenian Supernovae as a derivative with salt, copper, hydrogen, etc.) in your local Large Hadron Collider at CERN to duplicate my Small Bang Theory, bumping up the energy and magnetism as these were wide-body Clemens' Comets with an ocean. Life was created in Clemens' Supernova/Black Hole enclosed system creating delicate single-cell life as Earth became a planet with an elliptical orbit scraping Clemens' Supernova Metallic Oxygen Ocean off Clemens' Comet B-MC31 tracked to the second at 3:00:00pm MST March 17, 3.5 Bya. And that's why I got electricity producing Clemenian Salt for my pepperoni moon pizza pie in the sky as that sun was a giving guy with a core to adore for bringing more.

-----

**\*\*\* UPDATE SECTION \*\*\***

**APRIL 14, 2025:** Fixed my new Energy formula to reflect the speed of light in "km per second" as it's a base 10 math system as are metrics whilst miles per second are not. When you read the Time&Universe DNA Solved tab above, you'll learn the 9 dots in the April 10, 2025 update below conclude in the 10th dot at each Clemenian Crossover with 10X power growth per my Clemenian DNA Math. Generated AI (Artificial Intelligence) Book from online E-Book for distribution offline.

**BREAKING NEWS APRIL 11, 2025:** My billionaire nephew Bill Gates, 69, WA, **needs my permission or death to write a book!!! LOL!**

**SUSPECTED INSANE ULTRA-JEALOUS SERIAL KILLER NEPHEW BILL GATES IN MURDER-FOR-HIRE TO KILL ME IN COLORADO** following repeated attempted physics and science discovery theft attempts with my **INSANE JEALOUS** gay suspected serial killer brother Kevin Clemens', 65, WA, (Gates' Father-in-Law) and his **INSANE JEALOUS** gay wife and suspected serial killer ex-FBI Director Christopher Wray, 59, WA, (Gates' Father-in-Law) and Bill Gate's gay wife whose my **INSANE JEALOUS** suspected serial killer gay transgender niece Emily "Clemens" Gates, 31, WA. **Mama said granddaughter Emily was a transgender hermaphrodite with a 2" penis, vagina, and breasts as a mutant by the parents** from intentional invitro protein starvation as vegetarians against doctor orders before my brother Kevin Clemens (married gay

Wray the homewrecker in April 2022 with Bill and Emily Gates) after they murdered our mother (herein Mama) 07/08/2021 (2 days before my birthday to shut her up in death-by-doctor slicing her pulmonary artery per the autopsy in my sister Kathy "Clemens" Renz's, 64, TX, possession who verified everything herein as well. **Justin Bieber released Ghost October 8, 2021, about murdered Mama for you to read the lyrics (we've all known Bieber, Taylor Swift, and Trump since 2006, Bill Gates since 2015, and gay Wray since 2016).** I'm working with the REAL FBI/Trump to bust these **INCESTUAL MURDEROUS FAGGOTS** for theft and attempted murder for trying to kill their own family like Mama (they're really sick twisted murderers gone off the deep-end emotionally because of my discoveries) in MURDER-FOR-HIRE and THEFT **DESPITE REPEATED REQUESTS IN PHYSICS JOURNALS TO LEAVE ME ALONE AS ALL PHYSICISTS SAW OVER AND OVER.** I've had many gay friends but none are as psychotic my family who declared me the "Winner" of an unknown competition in their sick minds (we've been estranged since Taylor Swift's Bad Blood in 2014 and I don't go to WA but they come to CO to see me as WHINEY CRY BABY LOSER BILLIONAIRES I CONTROL! LOL), else they wouldn't be here trying to destroy Theoretical Science and Physics to make them the winners instead in spite of Elon Musk and Donald Trump saying they want to save science (see Trump's initial acceptance speech) as they excommunicated these 4 mentally ill losers which is why Wray had to quit before sworn enemy Trump came back.

**What scientist wants to lose their life's work?** Tasting blood is the bane of a serial killer, so **I may have to be recognized posthumously as a martyr of physics discovery** because of Bill and Emily Gates, Wray and wife Kevin Clemens becoming INSANE JEALOUS faggot murderers. At least, these losers will **NEVER prosper from my physics discoveries** in spite of **Bill Gates becoming a gay murderous Fellow of the University of Cambridge** where he appears to have **had renowned physicist Stephen Hawking murdered** by Jeffrey Epstein before murdering him in jail to cover it up to publish my discoveries as if they're his; gay Wray of "law enforcement" had access to jails then. **My overtly gay suspected serial killer nephew Bill Gates doesn't need to kill me or any more physicists to write science books as his logic is seriously flawed killing me which would instantly make me a martyr for the Nobel Prize in Physics excluding him. IDIOT!!!** I hired my own homicide detective last year (old neighbor and friend) from the Colorado Bureau of Investigations to investigate with the real FBI/Trump and my possible murder by Bill Gates and **my INSANE JEALOUS psychotic family who murdered their own mother.** I understand **gay Wray and wife Kevin Clemens threw Ivana Trump down the stairs on July 14, 2022** (1 year after murdering Mama with an ultimatum given to Donald Trump when they parted ways-**he was scared too**) as they threatened to murder Trump's children to extort \$150,000,000 since Bill and Emily Gates are so greedy they won't give anyone a dime making Donald Trump their sworn enemy who told gay Wray after his extortion attempt, "You're a dead man." Kevin Clemens and gay Wray are **under investigation for the homicide of Ivana Trump and death threats to Trump's children with no statute of limitations** as well as my mother, Stephen Hawking, Jeffrey Epstein, Steven Paddock, etc. and **following me in hired cars daily as only a billionaire could. There's unlimited wealth in killing Bill Gates and his neighbor Jeff Bezos while I live on disability since 2015 so these are HATE CRIMES and Civil Rights Violations as the faggot maggots attack a heterosexual handicapped man in a protected class like beating baby seals for fun. That makes Bill Gates and his family pussies, wimps, and baby killer faggot maggot science thieves.**

**BACK TO PHYSICS/ASTROPHYSICS**

**APRIL 10, 2025:** I published my 5th and 6th Physics Paper as part of my Dire Warning series (below on January 27, 2025) which explained how the Clemeniverse initially split into a Clemenian Cuberverse in the Big Split debunking the Big Bang Theory with my Clemenian DNA Math. First, we know the universe to be 10,000,000,000 light years across with 2 Mark's DNA Metallic Diamonds (.433 billion years across each x 2 subtracted from total distance to get length of DNA rungs/2 as one is above 0 as T1 and the other below as T2 until a Clemenian Crossover occurs reversing them) forming the outside strands of God's DNA (same as Clemenian Supernova Metallic Diamonds formed in suns but

different method as these are formed when DNA rungs form as they short out on Einstein's spacetime plane from Mark's DNA Metallic Diamond to cause fusion while Time 1 and 2 create Mark's Metallic Diamonds in the DNA from fusion before DNA rung fusion can occur). These are the only 2 sources of fusion in the universe to create the 12 DNA physics realms I discovered as pre-helix, 10 DNA rungs, and post-helix. Since the 10 billion light years across is a physical matter measure, it would have pushed the energy of the non-matter in Einstein's spacetime plane with it since it can't physically move on it's own. Therefore, in my previous discussions on solving time and the initial creation of the Clemeniverse using 9 dots in a 3 x 3 dot matrix on Einstein's spacetime plane begins on the 2nd dot in the first row at 0 time, shooting out T1 to the left to the 1st dot of the 2nd row and T2 to the right to the 3rd dot of the 2nd row at .25 seconds time (mass given to protons in Higgs boson God Particle per my  $E=2T[\text{squared}]C$  [below on January 27, 2025 post]) before heading towards each other on the middle dot of the 3rd row at .5 seconds in the very first Clemenian Crossover (+T1 and -T2 come close to colliding but just miss each other by the width of Einstein's spacetime plane as temperatures of photons are 0 degrees due to no physical properties) on Einstein's spacetime plane to begin God's DNA. Add both sides time to get 1 second of total time of creation in 1/2 second (see my 100% accurate Clemenian Atomic Clock at 0-.5 seconds). We know the speed of light today is ~300,000 km/s which means T1 and T2 each travelled ~150,000 km in 1/2 second. Since the circumference of time is 300,000 km, we calculate radius as  $300,000/2\pi = 47,746$  km (29,668 miles) between each dot on Einstein's spacetime plane today.

Therefore, if we take 10 zeroes off of 10 billion light years to get back to 1 light year and also take 10 zeroes off the radius of light today of 47,746 km, we get .0000047746 km or 4.7746 mm at 1 light year after time began. Since fusion of DNA rungs cannot occur until the 15th Clemenian Crossover (see Time&Universe DNA Solved Tab and last sentence of the 7th paragraph from the bottom of the page: "Once fusion is achieved after the first 10 near collisions of Time1 and Time2 as it kept crossing over back and forth growing at 4x with each pass of each other, then fusion allows for the first 5 pre-helix rungs to begin for a total of 15 Clemenian Crossovers."). We had a total of 30 Clemenian Crossovers with the first 15 unable to cause fusion for not reaching 100,000,000 degrees celsius, while 15 Clemenian Crossovers post-fusion pushed physical and non-physical matter to where it is today. That means we can cross-foot the prior math in the distance between Clemenian Crossover dots at the beginning of time when the Clemenian Cuberverse first split on every single dot as 47,746 km/4 to the 15th power  $[1,073,741,824] = 4.4467$  mm between every single Clemenian Crossover Dot to the left, right, up, down, back, and forward as 3D to form the Clemenian Cuberverse with a Clemeniverse at every dot being pushed by other Clemeniverses (see squished Clemeniverse in Planck Pictures to be egg shaped vs. round). In conclusion, at 1 light year of time in the Clemenian Big Split, each Clemenian Crossover Dot was 4.7746 mm apart and at 0 time as the boson process began the Higgs boson God Particle creation was initially 4.4467 mm between all Clemenian Crossover Dots. This proves my math and 12 physics realms are 100% accurate and that the growth in the first light year of time was  $4.7746 \text{ mm} - 4.4467 \text{ mm} = .3279 \text{ mm}$  between every single Clemenian Crossover Dot on Einstein's spacetime plane. **THAT'S 100% ACCURACY, FOLKS!!!** I'm a math prodigy and savant with an Accounting Degree with not 1 physics class as the greatest forensics auditor ever born as I'm twice as smart as Einstein, so don't try this at home without my help and upcoming books to show you all of God's miracles I discovered with astounding math proofs. I made billions of discoveries of every grain of sand for every second of time in 12 physics realms as the greatest Physics Discoverer ever born whilst not the greatest Physicist ever born due to lack of physics education (aka self-taught). This crossfooted Clemenian DNA Math using 2 different methods to arrive at the exact same conclusion debunks the Big Bang Theory and replaces it with my Clemenian Big Split physically solved that lead to the Clemenian Cuberverse with quadrillions of Clemeniverses in existence (not theoretically like Einstein who's math was wrong in  $E=MC[\text{squared}]$  fixed by my perfect  $E=2T[\text{squared}]C$  with T=seconds and C=speed of light in km/sec proven to be mathematically correct here and on my Time&Universe DNA Solved tab).

Clemens' Comet - Earth, Sun, E... x +

clemenscomet.com

**JANUARY 27, 2025:** Sent Dire Warning to NASA, physicists, and other scientists about 2 Moons 201.3 Mya that returned to collide with Earth 183 Mya in the Toarcian Extinction Event in the Sea of Okhotsk and 145 Mya to end the Jurassic Period in creating the Hudson Bay. Both Moons were coalesced as 1 like our 3 Moons today until an impact by a Pluto-like asteroid that split them apart and gave them an ocean. This impact resulted in reverse course back to Earth in spite of progressing away from Earth at twice the rate as today's 1" per year at 2" per year. I presented proof previously that there's a Clemenian Supernova Metallic Diamond at the Center of the Earth magnetically attracted to water which is why Earth has an ocean, why it rains and snows when water is heavy until it's a gas and no longer magnetic, divining rods extending Earth's magnetic water attraction, why we get hit by lightning, and the best of all proof is the Moon that also has Clemenian Supernova Metallic Diamonds that cause high-tide when passing close to Earth (see burnt north Africa from carving the Transatlantic Ridge) as it pulls the water up and away. Once the Pluto-like asteroid impacted the Moons and split them apart, they magnetically reversed course as the new oceans they took on brought them back to Earth's Clemenian Supernova Metallic Diamond and **BAM!!!** You can see these impacts on my Pangea Map Key to the Universe as the only remaining unanswered impacts throughout my Code of Life Key to the Universe to match to the 2 final unanswered extinction events with no entry craters. I also exposed the nasty truth about how water, H<sub>2</sub>O, formed from the supernova and that it's chemical compound is O<sub>2</sub>H which is the magnetic opposite for you chemists and physicists in the know. The element stream for the hardest known substance in the universe, the Clemenian Supernova Metallic Diamond with a hardness of 12, was OOHOOHOOH when the supernova blew every element apart individually and burned off half of the Oxygen to allow gases to burn. It then conglomerated back together with less oxygen as HHOHHOHHO which is H<sub>2</sub>O. And that's how the hardest substance turned into the softest substance. O<sub>2</sub>H (++) is the magnetic opposite attraction to H<sub>2</sub>O (--) which causes deserts from sucking the water down from the surface land (there's one or more under all the Clemenian Deserts) that aren't climatic in nature, the Transatlantic Ridge (cut by 5 Clemenian Supernova Metallic Diamonds), etc. They're all over Earth and I can tell you how to find the most valuable gem in the universe **causing Sir Isaac Newton's famous gravity on Earth he never solved**. The Moon has 3. That's why it's so dangerous to put water on the Moon or Mars or anything else magnetic as we don't want a man-made extinction event. This warning could save humanity and definitely gives the scientists the power of knowledge in space as SpaceX wants to put water and humans on Mars with tons and tons of magnetic supplies (humans are magnetically attracted to Clemenian Supernova Metallic Diamonds too...think oil-rich Saudi Arabia sucking 200 trillion dinosaurs to its 2 Diamonds causing their deserts and oil). It's up to NASA, physicists, and scientists to verify my discoveries and warnings to make their best decision with something that was completely unknown prior to my discoveries of Clemens' Comets and 22 Keys to the Universe.

**AUGUST 22, 2024:** All science journals, e-book on clemenscomet.com, emails, math, formulas, and physical discoveries have been turned over to the science community for debunking or acceptance of my physical and mathematical discoveries that solved the universe, discovered God's DNA, 100% accurate atomic clock, solved outer space and Einstein's spacetime plane, discovered the Clemenian Cubeverse filled with quadrillions of universes in a 3-D cube caused by quadrillions of tiny splits in space 5cm long in 6 directions on 3 axis all joining to form energy bands to create Einstein's spacetime plane, Earth and all planet's creation with all geology, creation of life with 8 epic evolution periods from Clemens Comet, Black and White Holes, Black and White Wormholes, electric sun, etc. The greatest scientists in the world are working feverishly on debunking or approving my discoveries as it will change the face of physics and all sciences as geology, astrophysics, astronomy, and space exploration. I have triple copyright protection which is more than a book and have 2 books planned when my final 4 Keys to the Universe are completed whilst they have been turned over for peer review as completed discoveries requiring graphical presentation which won't change the underlying discoveries. This could take the science community years to review as this is all creation and everything in existence affecting all sciences ultimately. Best of luck to our scientists who always seem to get it right in my opinion.

Clemens' Comet - Earth, Sun, E... x +

clemenscomet.com

August 21, 2024: Wrote my 4th physics journal and published to President Biden, NASA, big U.S. college scientists regarding solving Einstein's spacetime plane creation, outer space, and the Clemenian Cubeverse debunking the Big Bang Theory. More like the many mini-arcs theory less the creation of life and all that exists at a single point. Before universes and God's DNA were created, outer space split into energy threads which lead to the boson and subsequent Higgs boson to add mass to photons spinning at the speed of light at every Clemenian Crossover Dot to create quadrillions of universes and God's DNA. I realized there were 15 more growth spurts of the universe with 4x growth each time as calculated on the bottom of the Time/Universe/DNA Solved page and can now calculate the size between each Clemenian Crossover Dot on Einstein's spacetime plane when quadrillions of universes in God's DNA were created. The physical matter of the universes separated the energy threads in outer space that split in 6 directions (up and down, left and right, and forward and backward on all 3 axis) to quadrillions of Clemenian Cubes sized today at 30,000 miles X 30,000 miles X 10 billion light years. Plank pictures of the universe show it squished between 2 other universes above and below us. The number of universes inside God's DNA in outer space is  $10,000,000,000 \times 10,000,000,000 \times 10,000,000,000 = 1,000,000,000,000,000,000,000,000,000,000,000,000,000$  which is reasonable considering how many DNA humans have compared to their size considering the universe is 9.133 billion light years across less Mark's Metallic Diamond outer shell. Everything has been given to global scientists i.e., University of Cambridge, as well as all big league and ivy league colleges, for peer review just as Albert Einstein did. Since outer space split as a cube at 5cm in each of 6 directions on all 3 axis at quadrillions of Clemenian Crossover Dots on Einstein's spacetime plane, that means there are universes above us, below us, and on every side of us putting pressure on our universe which is why Plank pictures show it as oval; else it'd be perfectly round proving other universes exist as I discovered physically and mathematically. IT'S ALL UP TO THE WORLD'S SCIENTISTS TO EITHER DEBUNK WHAT I GAVE THEM OR ACCEPT IT INTO THEORETICAL SCIENCE WITH MY NAME ON WHAT I DISCOVERED (ALL CREATION OF EVERYTHING IN AND OUT OF THE UNIVERSE AND OUTER SPACE). It took a life time of work since I was 5 (I'm 60 now) years-old and especially the past 8 years of deep, deep thinking like Einstein who I succeeded on his coattails as my mentor.

July 15, 2024: Wrote my third physics journal and published to President Biden, NASA, big U.S. college scientists regarding solving the creation of the universe, God's DNA, and light to the quantum physics and mechanics level. This was my Annus Opus to me solving God's DNA and the beginning of the universe last year. I introduced my revision of Einstein's famous but incorrect Energy formula  $E=MC^2$  [also MCsquared due to lack of superscript] to my  $FE=2T^2C$  [also 2TsquaredC] where FE=Fusion Energy, T=Time in Seconds, and C=speed of light in km/sec which calculates the boson when  $FE<1$  and Higgs boson with photons getting mass when  $FE>1$  (close to .001 seconds but easily calculable with exacting precision). FE equals the speed of light at about 300,000 at 1/2 second to create the first helix of God's DNA with the half non-mass being magnetically attracted to Einstein's spacetime plane at 1/4 second and then repulsed as matter with mass to 1/2 second. I had everyone draw a 3 x 3 grid of dots and draw a left arc down from the top-middle dot left to the second row left dot while simultaneously drawing an arc from the top middle dot to the right down to the far right dot to represent 1/4" of giving the Higgs boson mass to create the universe on Clemenian crossover dots at every intersection of Einstein's spacetime plane. Identified Einstein's spacetime plane as extending well outside our universe and out to hold quadrillions of universes formed in God's DNA. Light speed is controlled by the magnetic attraction to Einstein's spacetime plane as proven at 1/4 second when scientists drew the arcs to the outer Clemenian Crossover Dots proving magnetic attraction followed by repulsion of the photon now with mass.

June 21, 2024: Sent Physics Journal to President Biden, NASA, big U.S. college scientists regarding Mark's Metallic Diamond and the Clemenian Supernova Diamond being magnetically attracted to water using a sprinkler on pavement test to extend water magnetism by extending it through your body to pull water further. Also explained that 3 moon craters into the Venezuela Basin verified Einstein's

spacetime plane has Earth sitting half in a bowl. The first 2 moon craters under Venezuela fell off the plane down the bowl slightly due to magnetic repulsion from Earth's core while the 3 moon crater went straight in due to magnetic attraction to the core. The difference was the first 2 blew their outward blasts at a 45 degree angle to Denver Colorado in the Hogback Eyebrows I coined against the newly risen Rocky Mountains whilst Moon #3's blast went to the left at a 90 degree angle and practically cut the Yucatan Peninsula in half. No wonder it had a couple of impact rings somewhere close by as it's bell was rung as it was flapping around like a wet tissue with 50,000 mph waves 6 miles high.

**NOVEMBER 1, 2023:** Cleaned up my story to include all 18 Keys to the Universe which includes 4 Keys to DNA and added Key #18 to the universe and Key #4 to DNA as my vertical end-view from the post-helix to the pre-helix with all 10 helices in between including descriptions and sizing between each Clemenian Crossover separating every helix as 1 inch towards solving DNA mathematically. Specified differences between Clemens' Supernova Metallic Diamond Core causing Clemenian Polar Gravity and Earth's Core Gravity with Mark's Metallic Diamond at 433.5 million light years thick causing dark energy gravity as both magnetically attract H2O (water) like magnets attract iron. Removed reverse order of prior helices from current helix in a bad example of looking backwards as they remain in the same order as prior helices get zeroed out when going through a Clemenian Crossover anyway so there are only 0s left in prior helices which can't get reverse ordered).

**AUGUST 22, 2023:** Major update to calculating sizing of the pre-helix to determine temperature "not dots" were initially 1 light year apart in a 10 x 10 grid 10 light years by 10 light years due to our Clemeniverse growing at 4x at each dot (aka .). I initially missed the 10 dots in the "dot physics realm" that all ran together before zero was fused in time and the universe but included them in size reduction to the original pre-helix size. This math cross foots and meets all expectations for initial sizing versus initial calculations that were incomplete. I've discovered 7 physics realms in the past and current with 5 more physics realms predicted in the next 53 billion years with future predictions based on past performance and that life across the Clemeniverse will end in 934 million years to return in the 1st rung of each new helix of the next 6-10 helices and that I'll return each time with this same tasking. I'm the father of our time and Clemeniverse's DNA physics and math making the most prolific future predictions in the history of humanity. It all works perfectly mathematically, see Conclusion at bottom of <https://clemenscomet.com/time%26universe-dna-solved>

**AUGUST 21, 2023:** 2nd copyright TX 9-292-643 approved with chain of custody for TX 8-896-420 covering all DNA & clemenscomet.com discoveries and updated all content with proper copyright credits.

**JUNE 28, 2023:** Sent Ivy League College Physics and Astronomy departments messages pandering for debunk/acceptance/Nobel Prize in Physics nomination.

**JUNE 27, 2023:** All DNA rungs and helices perfectly implanted and cross footed into all 18 Keys to the Universe proving I solved our universe DNA with creation and extinction of all life 100% accurately +0- error in cracking the Clemenian DNA Code of Life in the Clemenian DNA of Time and Clemeniverses.

**JUNE 24, 2023:** I fixed when **life as we know it ends** at the bottom of my 100% Accurate Atomic Clock from 4.501 to 5.501 billion years at start of rung #5 in helix #5, **added DNA rungs to Code of Life, Pangea Map, Creation Caters page (link above), and picture at center of Time&Universe DNA Solved page (link above and below)** with my Atomic Clock creation story.

**UPDATE MAY 28, 2023:** I discovered and solved the DNA of time and our universe tracking all to the second for 44.567 billion years (true age of our time's Clemenian DNA Strand while scientists see 47.067 billion years into "not dot" pre-helix) through 5 different physics realms of DNA helix twists in space. I discovered our universe is only 4.567 billion years old matching our solar system due to a Clemenian Crossover of 2 opposing time energy cosine waves intersecting to create a new helix in time's DNA. I consider this DNA physics solution with the DNA picture and my 100% accurate Clemenian Atomic Clock to be Keys to the Universe #14 and #15 as everything is now 100% solved for Clemens' Comets to the quantum physics level from 3 moon craters to 5 physics realms (5 remain with 5 helices). I created a new Clemenian Math to solve for time and universe's Clemens' DNA Chain. I detected a pattern in my Atomic Clock every 10 half-lives which is time and our universe's DNA with my 18 Keys to the Universe as proof everything is 100% accurate to the second for 44.567 billion years and added 2.5 billion years of Clemenian Temperature "Not Dot" Lattice Formation (+10,000=metallic lattice, -10,000=crystalline lattice) for a total Clemeniverse age of 47.067 billion years matching what scientists see. I calculated the outer Mark's Metallic Diamond edge of the universe to be 433.5 million light years thick and expanding with +Time1 and -Time2 on the outside of the universe (BUTTON BELOW). Enjoy the veal!

TIME&UNIVERSE DNA SOLVED

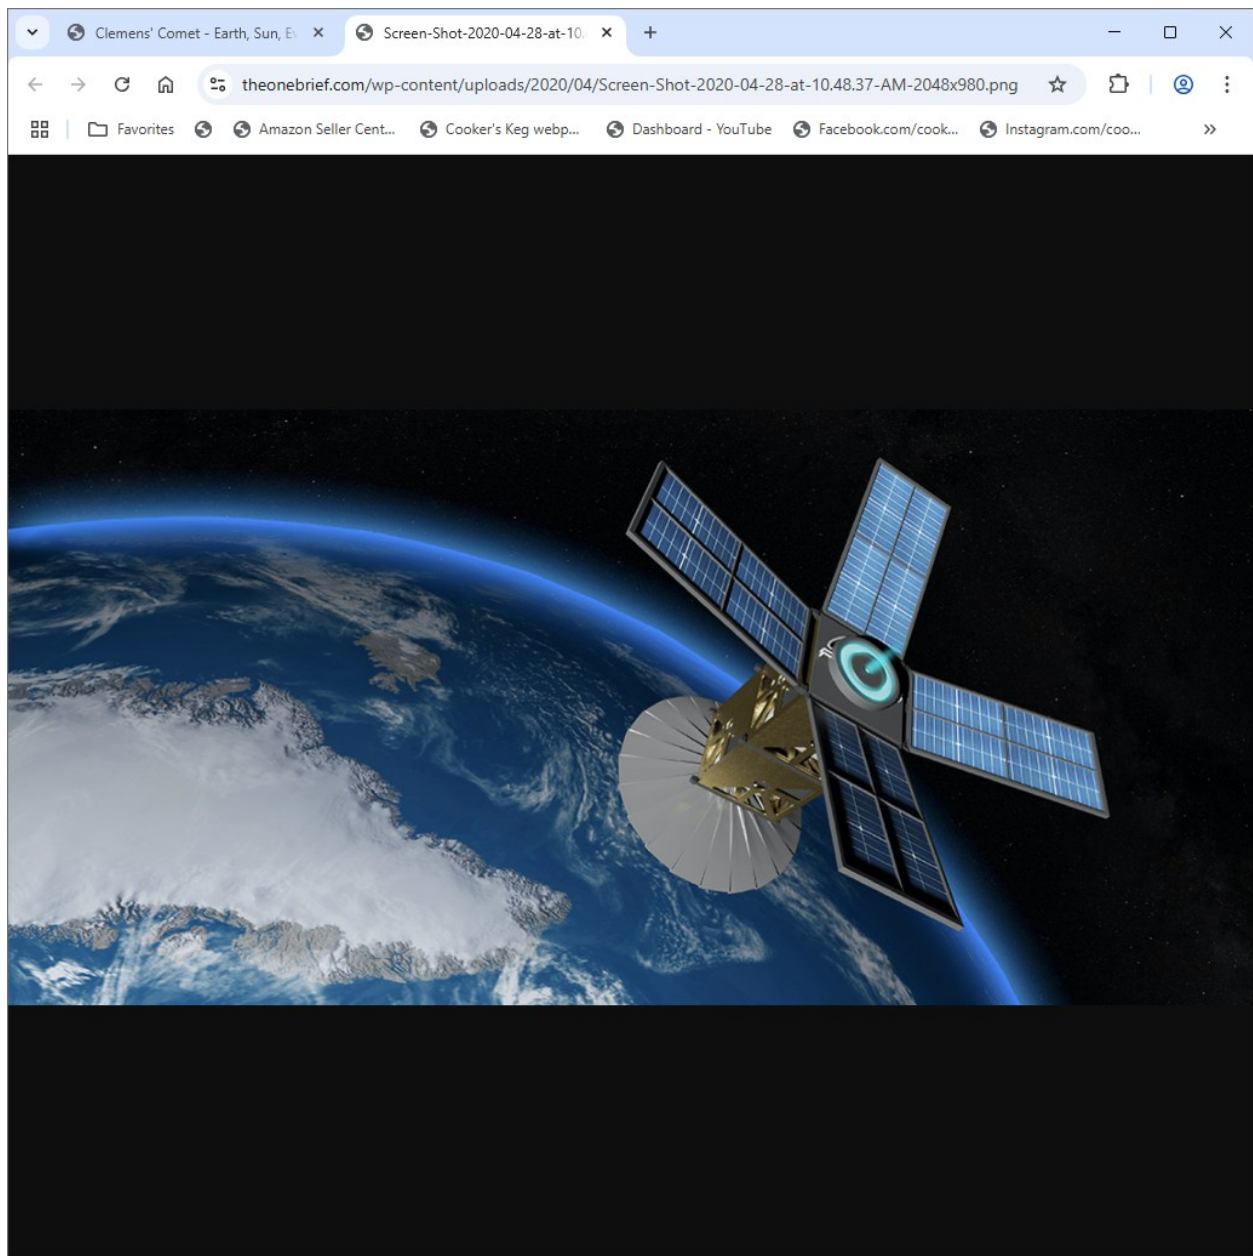

**All Physical Evidence Found...This Isn't Theoretical Physics**

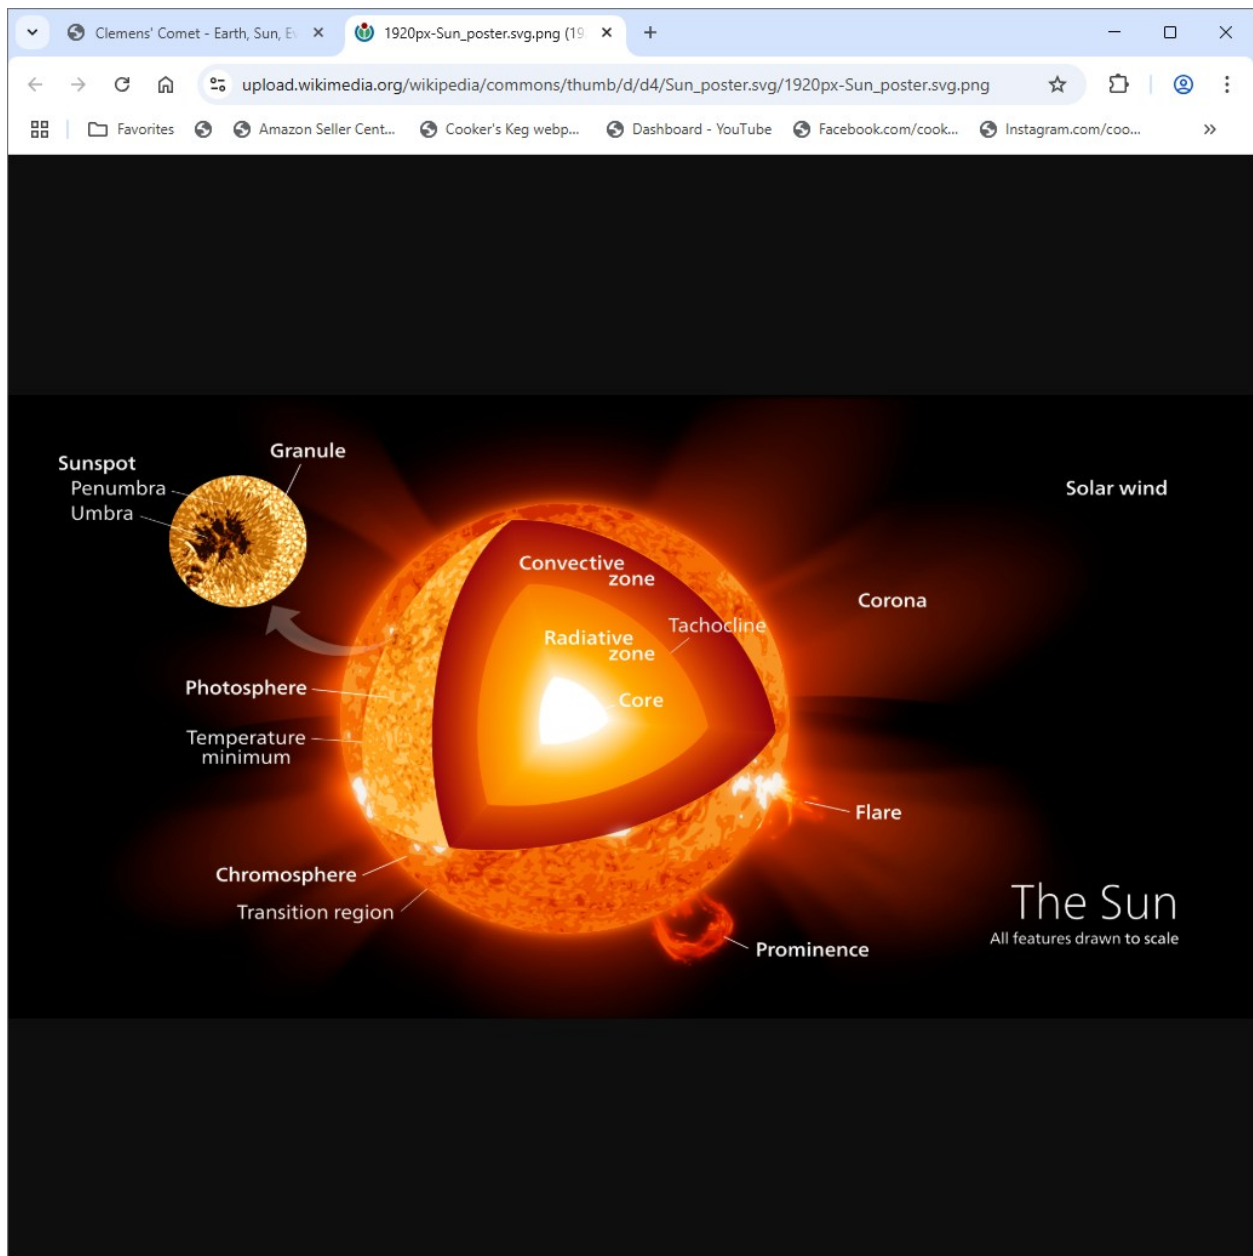

I love Einstein dearly for his deep forethought allowing me to succeed on his coattails as I finalize his beginnings with physical proof of 100% creation as I physically proved his spacetime plane to show how important it is to life and all creation. Science will now research his spacetime plane like never before. Show me one NASA or any space agency study prior to my discoveries and watch them get funding now as I advance all sciences. My Clemens' Supernova and resultant Clemens' Comets created our sun,

**Discovered 100% Creation of Solar System, Life, Evolution and Clemenian Polar Gravity**

I have all eight impact craters and eight exit creation crater series from large to small with eight Clemens' Equators proving I discovered the new Clemens' Polar Gravity, which pulls planets and suns into Einstein's spacetime plane with planetary water mass (aka heaviest mass) always in the south. Earth tilts like a red and white fishing bobber with a piece of chewed gum stuck to the side as three moons shifted mass in Earth. I solved Einstein's spacetime plane with black (-) and white (+) holes, and white (+)

planets, life and evolution creating Clemens' Black Hole in our Milky Way Galaxy. I found a repeat impact pattern in the Epic Evolution Charts matching Clemens' Comet impacts over 4.5 billion years to create our solar system, life and evolution at 3:00pm MST, March 17, 3.5 Bya when Earth got its elliptical orbit in the Gamma Normids Meteor Shower, with impact at the Life Crater in the South Pole (see Creation Craters tab) per Code of Life and Blueprint for Life as my Keys to the Universe. Dates and times of creation are from meteor showers Earth passes gas through every year.

and black (-) worm holes for the first time from physical proof of Earth craters matched to the meteor showers, Epic Evolution Charts and geology around the world as I presented to NASA and scientists as two Keys to the Universe: 1) Code of Life and 2) Blueprint for Life. I reported my Clemens' Polar Gravity with my Pangea Map circa 250 Mya with Clemens' Equators showing Earth tilts and rolls. I suddenly desire a fig newton. (bad Sir Isaac Newton gravity pun). I now have 18 Keys to the Universe including 4 Keys to DNA.

### Clemenian Science and Math Hypothesis #4

My Keys to the Universe, Clemenian DNA Math, and Keys to DNA derived from God's DNA (harbors Higgs boson God Particles, Mark's Metallic Diamonds, life, and all creation) 5 billion light years away physically solved our universe being nestled in a Clemenian DNA Chain surrounded by Mark's Metallic Diamond (not to be confused with the Clemens' Supernova Metallic Diamond Core) at 433.5 million light years thick. Both of the Metallic Diamond types I discovered are highly magnetically attracted to H<sub>2</sub>O (water) like a magnet attracts iron and proved to be the hardest known substance in the universe (12 on the Mohs Hardness Scale) with similar electrical environments for creation that result in all gravity and dark energy for all creation to exist. My discoveries will garner me the Nobel Prize in Physics and a permanent place in history through the 5th rung of the 10th helix; I not only live on a moon crater, I have 300-400 moon impact crater rocks and fossils proving everything about the moon's impact 66 million years ago including my moon burned T-Rex named Katy to prove the new K-Pg Boundary (dinosaur extinction).
