

LinqUp Mission

The LinqUp mobile application will be the first social media platform created specifically for Christian organizations. The ultimate goal of the LinqUp is to provide an alternative platform for Christians to share their faith and receive encouragement in an environment that fosters Godly principles. The LinqUp will provide an auto-censored ecosystem for the express purpose of Christian evangelism and encouragement across the globe. A portion of all profits generated through the LinqUp will be used to support our partner organizations in fulfilling the great commission given to us in Matthew 28: 19-20. We will work closely with our partner organizations to assess needs in our community and fill them. Evangelism and encouragement are our purpose and mission!
