Micelles have an amazing technology that uses tiny balls of cleansing molecules that love both water and oil; suspended in soft water, the micelles attach to dirt and oil particles that can then be easily wiped or washed away.

With high levels of vitamin A and C, apples are a potent antioxidant and act as gentle exfoliants due to their malic acid content, a chemical exfoliant that works to slough off dry skin cells.

Electrolyte-rich coconut water is excellent for hydrating. It's moisturizing but lighter than coconut oil, so it's particularly beneficial for people with oily complexions. It's non-greasy and contains vitamin C, calcium, magnesium, and glucose.

Gently wipe all over face to cleanse, avoiding eye area. Pro tip: For full-coverage makeup, 2 wipes may be needed.
