

Chromatography Prep Hardware

Shepard's offers a variety of advanced prep hardware.

To decrease leakage we have designed the frit cap out of Stainless Steel. This eliminates points of bending or bowing, allowing for much higher pressures (15,000+ psi). The cap also has an engineered flow path incorporated to increase dispersion and encourage even loading. We also offer adapting and packing hardware for all Prep columns.

With superior machining and the best internal finishes, Shepard Ind. Prep Hardware is the best approach.
