

Door Grille (DG)

Cooltech Industries Door Grilles are manufactured from robust aluminium extrusion and have been specifically designed for maximum air relief whilst minimising the possibility of sight from adjoining rooms. Cooltech Industries Door Grille is supplied with two quick fix snap together components. The first is the grille component which consists of v shaped blades spaced at 21 mm centres which will slip into one side of the door with the second component being the separate frame with steel spring clip fixings which is inserted into the other side of the door to complete installation. The inverted blades not only work to block vision they also provide strength. This rigidity and robustness will enable the door grille to withstand everyday knocks and bumps without issue. Standard finish is natural anodised however powdercoat colours from the standard powdercoat range as well as warranty powdercoat ranges are available upon request.

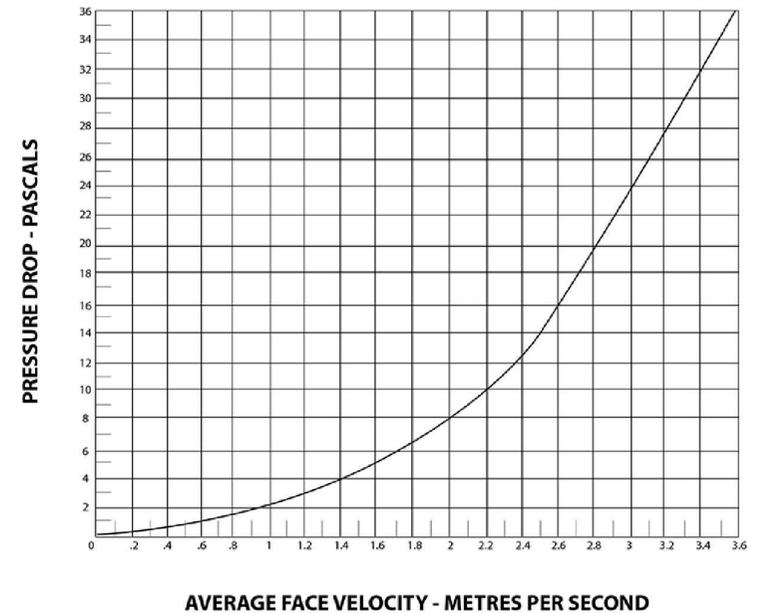

DG - STANDARD SIZES :

NOMINAL NECK MM	DOOR OPENING (MM)
600 x 150	605 x 155
600 x 200	605 x 205
600 x 250	605 x 255
600 x 300	605 x 305
600 x 400	605 x 405
600 x 450	605 x 455
600 x 600	605 x 605
