

Mesh Grille (MG25)

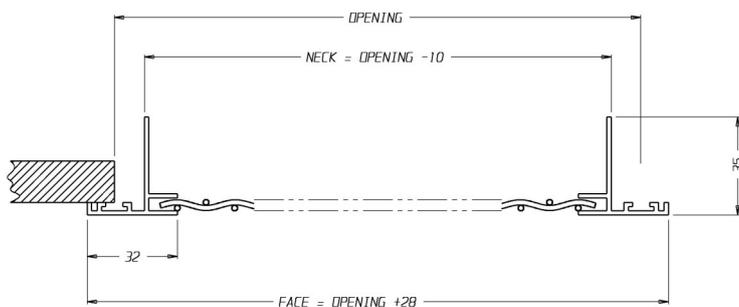

Cooltech Industries Mesh Grille (MG25) is a strong and robust grille used predominately for carpark supply & exhaust applications. The 25x25 Rapidmesh core allows for maximum strength and performance capacity. Due to the high free area percentage of 85% the Rapidmesh core will provide a similar performance to that of an eggcrate grille but with far superior strength and is thus suitable for high trafficked areas.

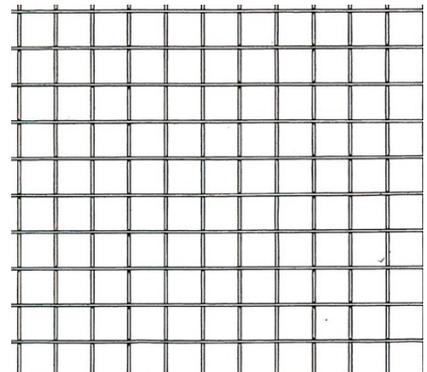

The core is enveloped by a frame manufactured from high quality aluminium extrusion and is sandwiched in place by a solid fixing angle which also acts to reinforce the core for maximum strength.

Cooltech Industries Mesh grille is supplied with the Rapidmesh core as standard however a range of expanded metal cores are also available upon request

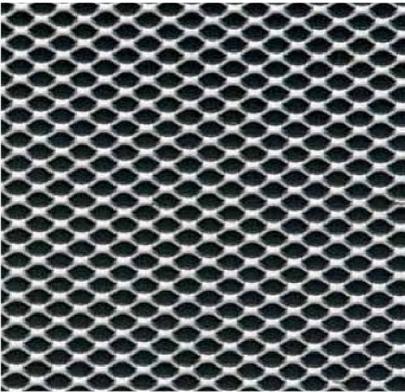

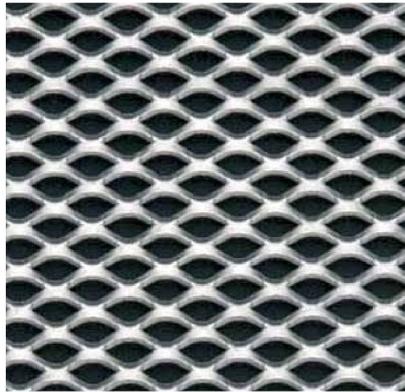

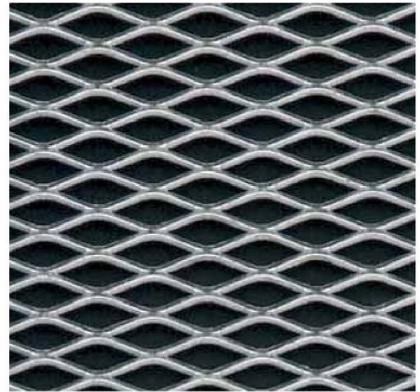

Standard finish is natural anodised however can also be supplied with a powdercoated finish if required.
