

Weather Louvre (OAL100)

Cooltech Industries weather louvres are manufactured from robust aluminium extrusion and have been specifically designed to minimise the ingress of rainwater under normal climatic conditions. The OAL100 type has a slimline profile with a standard flange size of 40mm however a larger 50mm flange is also available upon request. The double stop blade is extremely effective for maximising protection whilst maintaining as much free area as possible. Standard finish natural anodised however powdercoat colours from the standard powdercoat range as well as warranty powdercoat ranges are available upon request.

The OAL100 comes finished as standard with 12mmx12mm galvanised birdwire mesh for vermin control however it can also be supplied with a stainless steel variant, insect mesh, bushfire compliant & ember mesh upon request.
