The Drayage Challenge in Miami

Miami: a high-volume, high-complexity market

The Port of Miami is one of the busiest in the United States. Importers, brokers, warehouses, and carriers converge daily in an ecosystem where response times and coordination are paramount.

The lack of communication between the actors generates unnecessary costs, stranded cargo, detention and demurrage that directly impact profitability.

LIMITED APPOINTMENTS

Congested ports with increasingly restrictive appointment windows.

LACK OF FOLLOW-UP

Without real-time visibility, the payload is lost in the operational process.

ADDITIONAL COSTS

Demurrage, per diem and detention accumulate due to lack of coordination.
