Ref: *Testimony for Simon Orton*

Advanced Solutions Group Pty Ltd is a provider of contract professional Technical, Risk, Training and Project Management services to clients in the mining, civil and major projects sectors throughout Australia and the globe.

Recently we undertook the facilitation of a Mid-Project Review of the only Open Cut Coal Mine operation in Pakistan. The Project, the Thar Block II Mine, has been deemed a significant and critical project by the government of Pakistan and is of an extremely high level of criticality.

Simon greatly impressed me with his depth of professionalism, enthusiasm and technical know-how from the point of scoping, right through to final delivery for our client in the execution of a Mid-Project Review.

In a very short time Simon established the key measurement areas, risks, developed action plans and execution strategy to help us achieve project success. Simon also provided the leadership and direction for the review team and led the delivery of the objectives throughout. During the time on site, Simon was invited to present a Professional Development opportunity for our client team. This 'PEP' motivational talk was greatly received and will be of direct assistance to the client management team in building improvement performance in their departmental teams.

Yours sincerely

Anthony Beasley**Director****Advanced Solutions Group Pty Ltd**
