“And all that dwell upon the earth shall worship him, whose names are not written in the book . . .” (Revelation 13:8).

Dear friend,

March 2025

Donald Trump and his billionaire sidekick Elon Musk have hit the ground running. It is reported that DOGE (Department of Government Efficiency) which Musk is in charge of has cut \$55 billion of government waste so far—a tiny fraction of the \$6.8 trillion federal budget. DOGE also claims that tens of millions of dead people are receiving Social Security payments.

So the question remains: Is Donald Trump and Elon Musk really wanting to help the American people by tracking down and getting rid of government waste programs or do they have another agenda hiding up their sleeves? We will answer that question in this edition of *Tribulation Watch Newsletter*.

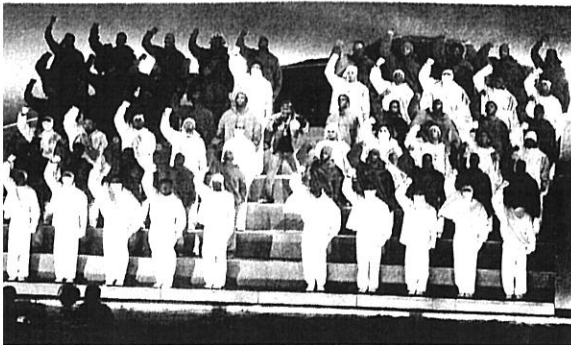

God bless you!

Bro. Matt Tiemann

“Mark my words—A.I. is far more dangerous than nukes”—Elon Musk

Did you know the elite are using the NFL to divide and conquer America?

The NFL Superbowl halftime show over the past two decades has been used by those (Communists) who rule over us to divide and conquer, and spread evil throughout the land. This year’s show was no exception.

A semi-popular rapper named Kendrick Lamar hit the stage on the field singing lyrics nobody could hear or understand, unless of course, you like songs about homeboys, gangster guns, cocaine, pedophiles and Lucifer. The Illuminati’s who sell their soul to the Devil, supposedly for fame, want everyone to believe that everything is controlled by evil forces, and if you didn’t pick up on all the symbolism of this at the Superbowl halftime show, you will now.

To start things off, actor Samuel Jackson dressed as Uncle Sam of the U.S. government, tells us how much we’re divided as a cultural nation, and that the Left needs to tighten up their stance and become even angrier and more violent. Dancers were dressed up in American flag colors in a stance of the flag that’s DIVIDED down the middle.

The symbolism is obvious. The whole show was Leftist political and Satanic, as we see all these performers doing a satanic (Masonic) hand gesture to let all the “insiders” know the Left is in “danger” and “distress” and so then they’ll all know exactly what the rest of the show is going to be about.

Get this: the spectators in the in the stands around the 50-yard line were all instructed to hold glittery cards that spelled out “Warning, Wrong Way,” supposedly symbolizing the wrong direction that America is going now that Donald Trump is back in the White House. At the end of the show they flipped the cards over which said GAME OVER!

Uncle Sam (Samuel Jackson) reappears talking about some kind of scorecard, referring to video games, and says to deduct one life, maybe hinting about another Trump assassination attempt. There’s a shadowy display of the “hanging man” on a light post, also depicted in Tarot cards, which means surrender and sacrifice, or letting go to gain something greater.

The singers entered the middle of the illuminati triangle. Much of the stage was set up to resemble a video game controller to capture the attention and minds of video game players across America who are more apt to be brainwashed by the Lucifer cultists. Rappers are feuding about pedophilia (sex with children) these days and who's taking sides with P. Diddy, who got busted big time and could take down a whole swath of perverted elites with him including Pastor T.D. Jakes.

Make no mistake, this Superbowl halftime show was about causing division and spreading more evil in the land. It was about catering to the Satanists and the Cult of Pedophilia that ran amuck during the Biden Regime. They are bragging about it in the open, on stage, at the world's most popular sporting event. —S.D Wells, *Natrual News*

ELON'S GOLDEN AGE

On January 20, three of the world's richest men, Elon Musk, Jeff Bezos and Mark Zuckerberg were given priority seats at Donald Trump's 47th inaugural speech for President of the United States. These three men have an estimated combined wealth of 850 billion dollars. But they have something else in common that you won't hear on the nightly news. Yes, all three billionaires are Transhumanists working together to bring in the Golden Age of A.I. (Artificial Intelligence).

History of Transhumanism

Transhumanism is a philosophical and scientific movement that advocates the use of current and emerging technologies—such as genetic engineering, cryonics, artificial intelligence (AI), and nanotechnology—to augment (increase) human capabilities and improve the human condition. Transhumanists envision a future in which the responsible application of such technologies enables humans to slow, reverse, or eliminate the aging process, to achieve corresponding increases in human life spans, and to enhance human cognitive and sensory capacities. The movement proposes that humans with augmented (increased) capabilities will evolve into enhanced species that transcends humanity—the “posthuman.”

The term *Transhumanism* was popularized by the English biologist and philosopher Julian Huxley in his 1957 essay of the same name. Huxley believed it was possible for social institutions to supplant human evolution in refining and improving the human species through social and cultural change. However, today modern Transhumanists advocate using technology and science supposedly to help the human race to become smarter and live longer.

In his book, *The Age of Spiritual Machines* (1999), the American *Transhumanist* and computer scientist Ray Kurzweil predicted that machines will not only overtake human intelligence but will appear to develop free will and have emotional and spiritual experiences. In *The Singularity Is Near* (2005), Kurzweil expanded on this theory to predict an impending *singularity*, in which human intelligence will *merge* with artificial intelligence and all disease, aging, social ills, and death will be reversed, resolved, or eliminated.

Brain Chipping Humans

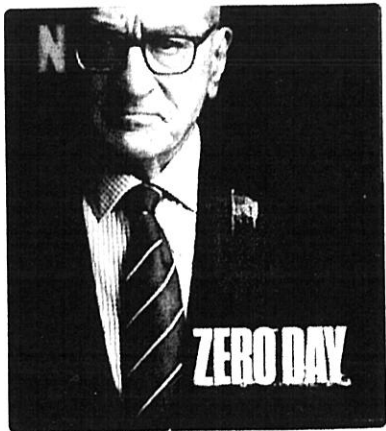

Elon's Golden Age includes human brain chips which is a vital part of the *Transhumanism* agenda, and he is leading the charge! In 2024 Musk predicted that ‘hundreds of millions’ of people will have “his” brain chips within the next 20 years.

Neuralink, Elon Musk's brain chip company is currently testing its device, which allows paralyzed people to use digital devices solely via thought, in a small number of disabled patients. The company is also working on an implant aimed at restoring vision. Last year, the FDA gave that device a designation aimed at speeding up development and federal review, the company has said.

Final comment: Some believe Elon Musk is the Antichrist. However, it's too early to tell at this point in time. But a computer chip placed inside a person's head which can read their thoughts fits perfectly with Bible prophecy: Let's read: *"And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name". (Rev. 16-17).*

Conspiracy Alert!!!

The Synagogue of Satan Jews that control Hollywood are good at producing movies and TV programs which contain hidden messages. Some of these messages foretell the future. That appears to what they have done through a recent TV miniseries called *Zero Day*

The series follows Robert De Niro's George Mullen, a former president who is appointed as the head of the Zero Day Commission after the Zero Day Attack. The entirety of Netflix's *Zero Day* centers around the fallout of the *Zero Day* Attack which bank accounts, water and electricity all go to Zero in one day. Here's what happened, how it happened, and who did it. Zero Day takes place in the aftermath of a devastating worldwide cyber attack, one that led to countless deaths and destabilized the entirety of the United States of America. The majority of Zero Day's story is about George Mullen and the Zero Day Commission attempting to uncover who was behind the attack and how they pulled it off. So, here is everything that the Netflix miniseries reveals about the truth behind the attack.

Throughout *Zero Day*, Robert De Niro's George Mullen and the Zero Day Commission come up with a variety of explanations as to how the Zero Day Attack was pulled off. Their first theory is that it is a piece of Russian malware used to destabilize the United States, with the code containing the phrase "midan" referencing the real-world Euromidan event. However, Mullen eventually began to believe that a left-wing extremist group from within the United States was behind the attack. After investigating this for a while, Mullen came to a different conclusion: The Zero Day Attack was carried out by government officials and wealthy elites.

Monica Kidder a wealthy tech mogul, was one of the masterminds behind the plan. The Zero Day attack was only able to be carried out thanks to Monica Kidder's incredibly popular apps. As *Zero Day* explains, Kidders apps are so popular that they are on 80% of all phones. Because of this, they became the perfect weapon to access nearly every bit of technology in the world. Kidder's apps contained a bit of code that allowed them to hack into the various technology systems, with them being so widespread that it could cause a nationwide blackout. Monica's apps acted as a Trojan horse turning each phone into a deadly weapon.

House Speaker Richard Dryer, played by Matthew Modine, was one of the most significant members of the Zero Day conspiracy. He acted as the ringleader of the criminals, with him organizing the various individuals who were involved and making sure that the attack could be carried out. Richard Dryer's position within the government played a key role in covering up the conspiracy for so long, with him constantly pushing back against George Mullen and the Zero Day Commission's attempts to find the true conspirators.

Despite the Zero Day Attack leading to all kinds of death, most of the perpetrators behind the attack believed that it would lead to a greater good. The politicians who were involved believed that the country had become too divided in recent years. They thought that a mass tragedy would bring the country back together, allowing legislation to be passed and progress to be made. That is why they carried out the Zero Day Attack, but it didn't work in the way that they thought. Instead, the actions of the Zero Day Commission only divided the country further, with the politicians getting caught in the end.

God bless you friend. Stay close to Jesus. Satan's army has come to kill!

The billionaire has not only declared that Neuralink is going full steam ahead, but that patients will be outperforming pro gamers within a few years: And that's not even his wildest claim. Elon reckons Neuralink is going to have to speed up human brains so that AI doesn't get bored."

After spending more than \$250 million to get President Donald Trump re-elected, Musk has been leading a sweeping effort to cut government spending, including at agencies that regulate his companies, such as Tesla and Space X. The dismissal letters sent to the FDA reviewers cited performance reasons, even though the employees had no issues on their prior performance, and had received top-notch rankings several weeks ago, according to the sources familiar with the matter. The supervisors of the cut employees weren't consulted before the mass layoffs and found out from their employees, the sources said.

Humanoid Robots

Elon's Golden Age also includes humanoid robots and lots of them. He predicts that in twenty years humanoid robots will outnumber humans 4 to 1. They will also be taking our jobs. "There certainly will be job disruption. Because what's going to happen is robots will be able to do everything better than us.... I mean all of us," said Musk, speaking to the National Governors Association in July, 2017. "Yeah, I am not sure exactly what to do about this. This is really the scariest problem to me, I will tell you Transportation operators will be the first to lose their jobs. But no job is safe. The robots will be able to do everything, bar nothing." Elon said.

Elon also predicts humanoid robots will be sexually compatible with humans.

Elon says, "Indistinguishable-from-humans robot companions will be mainstream in 15-20 years, and yes, you will be able to have sexual relations with them. A housewife who never nags, beautiful and customized to your taste." Elon has eleven children from three different human women, so a robot lady that is submissive and obeys his commands may work well for guys like him. In fact, Elon asked a robot lady out for a date last year. He even got a kiss!

Immortal Dictator

"If one company or small group of people manages to develop godlike digital superintelligence, they could take over the world. At least when there's an evil dictator, that human is going to die. But for an AI, there would be no death. It would live forever. And then you'd have an immortal dictator from which we can never escape." -Elon Musk 2018

Take a close look at what's unfolding, and you will find that Trump isn't planning to do away with the Deep State. Rather, he was hired by the Deep State to usher in the Golden Age of AI. Get ready for Surveillance State 2.0.

To achieve this turbocharged surveillance state, the government is turning to its most powerful weapon yet: Artificial Intelligence. AI, with its ability to learn, adapt, and operate at speeds unimaginable to humans, is poised to become the engine of this New World Order (Golden Age).

Over the course of 70 years, the technology has developed so rapidly that it has gone from early computers exhibiting a primitive form of artificial intelligence to machine learning (AI systems that learn from historic data) to deep learning (machine learning that mimics the human brain) to generative AI, which can create original content, i.e., it appears able to think for itself. What we are approaching is the point of no return!

In tech speak, this point of no return is more aptly termed "singularity," the point at which AI eclipses its human handlers and becomes all-powerful. Elon Musk has predicted that singularity could happen by 2026. AI scientist Ray Kurzweil imagines it happening closer 2045.

Here's a thought: what if Trump's pledge to cut the federal work force isn't really about eliminating government bureaucracy but outsourcing it to the AI tech sector (Elon and friends). Certainly, Trump has made no secret of his plans to make AI a priority. Recently Trump issued an executive order giving the technology sector a green light to develop and deploy AI without any guardrails in place to limit the risks it might pose to U.S. national security, the economy, public health or safety. Yes, Elon's Golden Age is close at hand!
