

## Florida Association of Fire Rescue Cadets

# Firefighter Rescue Drill

2025 Summer Gator Fire Games

### Objective:

This drill was developed to teach Cadets to work as a team. This event requires four (4) team members who will demonstrate their ability to safely negotiate an obstacle course to rescue a downed firefighter. The first obstacle is a simulated wall with a low-profile opening. The second obstacle is the declined plastic tube. The third obstacle is an enclosed A-Frame up and over prop. The fourth obstacle is an inclined plastic tube. The victim is a hose manikin with a SCBA that weighs approximately 100 lbs.

### Requirements:

- Each post can enter a maximum of three (3) teams consisting of four (4) Cadets/Explorers.
- No Cadet/Explorer can participate in this event twice.
- All team members will be in full structural turnout gear with SCBA without a mask (no hood)
- SCBA's will be available to use for groups that do not bring them
- No outside equipment allowed during this event.

### Rules:

1. Time begins on the "GO" command
2. The entire team **must maneuver completely through all four (4) obstacles**, collect the downed firefighter, **and maneuver back through all four obstacles.**
3. If any team member's protective clothing is compromised or removed (i.e. helmet falling off, gloves coming off, etc.), the issue must be fixed before continuing through the rest of the event.
4. No throwing of the victim, or an unsafe act penalty will be assessed.

### Penalty:

- Penalized **10 seconds** for each infraction. Helmets and gloves must be fixed before member can continue.
- Any unsafe act will result in a **20 second** penalty for each infraction.
