16. Description of Proposed Facility or Changes to Existing Facility

Provide a brief description of the proposed activities if application is for a new facility, or the proposed changes to an existing facility or permit conditions if the application is for an amendment.

The material to be processed will arrive via vacuum trucks delivered by properly licensed transporters. Manifests will be checked and only acceptable material will be off-loaded. The material will be off-loaded, screened, and inspected within the facility building, then pumped into temporary storage tanks located within an adjacent bermed area until processed. The processing of wastes involves pumping from the storage tanks into a treatment container for treatment, stabilization, and dewatering of the liquid using polymers. Free liquid will flow through specially designed screens, out of the treatment container and into the sump; solids will remain in the treatment container. The collected water will be pumped from the sump into a separate holding tank and then transported to another authorized processing or disposal facility. Solids will be disposed at an authorized compost facility, processor, or area MSW landfill.
