Ask your ShowerGuard Registered Dealer

Find out how easy it is to buy and love your new ShowerGuard glass enclosure. Your Registered Dealer can help you explore aesthetic options, qualify for a special rebate and plan a perfect installation.

WHY SHOWERGUARD® GLASS?

Ordinary glass degrades or stains over time.

HARD WATER

Exposure to any type of water causes corrosion, which permanently damages the glass, showing spots and mineral stains. The problem is even worse if you have hard water, which has a high concentration of dissolved minerals.

CLEANSERS AND SOAP

The cleansers and soap you wash with every day can build up on your bath and shower doors over time—and suddenly the surface is scummy, grimy and nearly impossible to remove.

HEAT AND HUMIDITY

The steamy environment of a bathroom can be harsh on materials, including glass. In time, it can degrade due to daily exposure.

The beauty of ShowerGuard glass endures.

ShowerGuard glass is protected by a permanent coating that fills in the natural peaks and valleys of the glass surface, creating a protective barrier against dirt and grime. The result is brilliantly clear glass that is guaranteed to retain its like-new look.

Magnified views of glass

▲ New uncoated glass

▲ Standard glass after exposure to typical shower conditions

▲ ShowerGuard glass after exposure to typical shower conditions

BEST-IN-CLASS PERFORMANCE

In independent laboratory testing, ShowerGuard glass outperformed spray-on and wipe-on products. Only ShowerGuard glass could be cleaned after extended exposure to hard water with dissolved minerals.
